TRAINING COURSES by keyrus

Architect of intelligence

Why choose Keyrus for your training needs?

Keyrus is an expert in data visualisation projects and Premier Re-seller in the Tableau Partner network. Backed by our expertise and strong partnership with Tableau, Keyrus is a trusted partner when it comes to delivering engaging and empowering Tableau training.

TABLEAU PREMIERE PARTNER

Keyrus is the only Tableau Partner on the African continent with extensive knowledge of all facets of the Tableau platform and unmatched practical experience in Tableau deployment.

DATA & ANALYTICS EXPERTS

Keyrus has unparalleled expertise in business intelligence and data analytics, utilising practical Power BI skills.

CUSTOMISED TRAINING

Keyrus trainers can customise courses to include your own data, making the training so much more effective and relatable.

ON-LINE OR IN-PERSON FORMATS

Keyrus trainers provide equally high standard of courses whether they are held virtually or in-person.

Understanding your Tableau

When choosing a **Keyrus** Tableau training course, it is important to understand your Tableau Role (License type). **Keyrus** Tableau training courses are carefully curated to each Tableau Role, to ensure that you get the best return on investment from your training.

Tableau Viewer

intended for business users who primarily consume & view dashboards & reports. Viewers can access & interact with shared content but have limited capabilities for customisation or creation.

Tableau Explorer

for users who need to interact with & analyse data, create dashboards & share insights directly through their internet browser (called Web-Authoring). Explorers do not have the same data modelling & formatting capabilities as Creators.

Tableau Creator

for users who need to build & design data visualisations, create complex analyses & develop data models. Creators have access to Tableau Desktop & other authoring tools.

Tableau Training Course: VIEWER

This is a **1-day** customised enablement training to familiarise Tableau Viewer users with the dashboards created for their specific departments and use cases. Each session will be customised to the content created for that user group. This training is designed to make use of existing client content that is pre-published to the client's Tableau environment. This ensures users learn using their data.

Who will benefit

End user or analyst who need to derive and share insights from business data. Users who are interested in this training may also be interested in Data Literacy - Services | Keyrus

Course content

Introduction to Tableau	**Tracking KPIs / metrics**
Signing into Tableau site	**Filtering data**
Basic server navigation	**Commenting**
Understanding basic data concepts	**Collaboration**
Reading common chart types	**Subscriptions**
Viewing reports / dashboards	**Analysing data**

Pricing

Contact us for a customised quotation based on your specific requirements and number of delegates to attend Tableau Viewer training. Contact sales@keyrus.co.za.

Book your Tableau VIEWER Training

Tableau Training Course: EXPLORER

This **2-day** fundamentals training is designed for Tableau Explorer making use of Tableau Web Authoring (Creating content using their Internet Browser). Attendees will learn fundamental Tableau skills and gain a thorough introduction to data analysis and visual design in Tableau and learn how to edit / build interactive dashboards.
This training can be designed to make use of existing client data that is pre-published to the client's Tableau environment. This ensures users learn utilising their own data.

Who will benefit

Professionals who needs to derive a greater value from their data, those who understand basic data concepts and architecture, and are wanting to build on their existing skill set.

Course content

Desktop workflow	**Viewing specific values**
Slicing your data by date	**Customising your data**
Using multiple measures in a view	**Showing breakdowns of the while**
Relationship between numerical values	**Highlighting data with reference lines**
Mapping data geographically	**Analysing data with quick table**
Building basic dashboards	**calculations**

Pricing

Users	*Cost/course/person	Duration
1-3	R7,200 ex vat	2 days
4-5	R6,600 ex vat	2 days
6-7	R6,000 ex vat	2 days
>7	R5,400 ex vat	2 days

*The outlined pricing is based on virtual (on-line) format.

Book your Tableau EXPLORER training

Tableau Combination Training Course: CREATOR

The combination course is designed and structured to guide delegates from beginner to advanced Tableau desktop users. This **3-day** course is designed for Tableau Creators and is aligned to the **Tableau Certified Data Analyst Exam** preparation. Attendees will gain a thorough introduction to data analysis and visual design in Tableau. The second half of the course will expand on these foundational skills and distinguish attendees as Tableau

Who will benefit

All data analysts and any business users who want to drive their own data analysis and dashboarding. **Individuals** aiming to automate their current manual data process, derive new insights from their data and enhance their data career.

Course content

Desktop workflow	Defining subsets of your data
Setting up connections & data sources	Using calculations in Tableau

Testimonials

Extremely enjoyed the training.

The content covered was valuable and will contribute to my day-to-day tasks.

The training material was very detailed and easy to follow.

The sessions are very interactive and allowed for questions and engagement.
