

## Lightbar Conversion Kits and New Pursuit Mounting Bracket System

If you have a lightbar purchased before 2011 you may have mounting feet with the one hole style. To update your mounting feet to the new Pursuit Brackets you will need to do the following:

- Non-lighted LIT3 Lightbar mounting feet with 1 hole will need the vehicle specific Conversion Kit listed in Table 1 below:  
- LCK-xxxxxxx and (2) T51309 (LIT3 Feet w/3 holes)
- Lighted LIT3 Lightbar mounting feet with 1 hole will need the vehicle specific Pursuit Adapter Bracket in Table 2 below:  
- LCK-L3WLED and (2)T51308 (Lighted LIT3 Feet with 3 holes)

If you have a lightbar purchased after 2011 you may have mounting feet with the three hole style. To update your mounting feet to the new Pursuit Brackets you will need to do the following:

- Non-lighted LIT3 Lightbar mounting feet with 3 holes will need vehicle specific Conversion Kit:  
- LCK-xxxxxxx (See the vehicle specific Conversion Kit in Table 1 below)
- Lighted LIT3 Feet with 3 holes will need:  
- LCK-L3WLED, Pursuit Mounting Bracket (vehicle specific Table 2) and (2)T51308 (Lighted LIT3 Feet w/3 holes)

**Pre 2011 Mounting System**

**Post 2011 Mounting System**

# LIT3 Conversion Kit

LCK-L3WLED      LIT3 Lighted Kit conversion hardware for all pursuit models & 2015 Tahoe

# New Pursuit Mounting Bracket Systems

## Design Features

- Pursuit Vehicles are getting faster with pursuit speeds up to possibly 160 mph. Code 3's upgraded lightbar Mounting Bracket Systems keep the lightbar securely fastened so drivers can focus on the pursuit.
- The new mounting bracket system is automatically included with all new lightbar orders and is available as a retrofit (conversion kit) on older model lightbars.
- The black streamlined lightbar mounting feet are the same as the existing mounting feet for both the lit and unlit version; however, a new aluminum plate assembly fits into the existing mounting feet, providing extra strength and security for high speed pursuits.
