CENTER *for* BRAINHEALTH®
THE UNIVERSITY OF TEXAS AT DALLAS

JULIE FRATANTONI, PHD, CCC-SLP

HEAD OF OPERATIONS, THE BRAIN HEALTH PROJECT
RESEARCH SCIENTIST

Julie Fratantoni is a cognitive neuroscientist and Head of Operations for The BrainHealth® Project, a landmark scientific study designed to define, measure and improve brain health and performance across the lifespan.

Dr. Fratantoni also leads the Center's Kindness Enterprise, a research and translational program seeking to uncover and harness the brain's capacity for kindness, empathy and compassion as critical components of overall brain health and well-being.

Dr. Fratantoni manages user experience, content creation and development of the Project's online BrainHealth dashboard, created to deliver cognitive assessments, coaching and training. This ten-year, longitudinal study measures brain health using the novel, multifaceted BrainHealth Index, a set of best-in-class assessments that helps track progress toward personalized brain fitness goals.

A licensed speech language pathologist, Dr. Fratantoni is also board certified in biofeedback, trained in mindfulness and meditation techniques and has led high-performance brain training for corporate executives, veterans, athletes and young adults. She is passionate about equipping others with strategies for building better brains, so they can lead better lives and ultimately create a better world.

The most rewarding aspect of her work has been empowering individuals to reach their highest capacity, reduce their stress, achieve their goals and be the best version of themselves.
