Sonae and Unilabs create Health & Nutrition Lab on Sonae Campus in Maia

This partnership allows the offer of a vast set of health and wellness services, benefitting Sonae companies' employees and their families.

Sonae and Unilabs have just opened Health & Nutrition Lab, a new area for health and wellness, located on Sonae Campus, in Maia. The project results from a partnership between the two institutions and aims at contributing to Sonae employees and their families' health and wellness, allowing their access to a vast set of services in a convenient and easy way, in advantageous conditions.

Health & Nutrition Lab offers services such as blood tests, nursing and the possibility of having other diagnostic tests done, such as electrocardiograms, Covid-19 tests or pathological anatomy tests. The new space also has a stake on innovation at users' service, like the virtual reality experience offered to users during blood collection.

Luis Menezes, Unilabs CEO stresses: *'It's the first time we set up a lab with such dimension in a company. We designed an innovative and highly convenient model for employees. This partnership with Sonae is aligned with Unilabs' purpose of creating health ecosystems, wagering on prevention, with an innovative and client-centred service'.*

Marco Aurélio Nunes, from Sonae FS Investment Fund Management Administration, states: *'On Sonae Campus, we are committed to making the lives of employees and their families easier. So, we offer an easy and comfortable access to over ten services that are essential every day, with exclusive conditions. The creation of Health & Nutrition Lab, through the innovative partnership with Unilabs, is another important initiative to achieve this goal'.*

Health & Nutrition Lab works from Monday to Friday, between 7:30 and 12:30. Blood collection and tests do not need advance booking and Sonae Campus employees and their families benefit from privileged conditions, as well as a virtual reality experience during blood collection, with content designed for adults and children.

Sonae Campus is the headquarters of the Group and the main centre of Sonae companies, with an area of 79 acres, where about 3,100 employees work. Sonae Campus stands out because of the variety of services available to employees. The offer includes sports' facilities (gym, football field and paddle courts), leisure areas (cycling, gardens and living spaces), convenience services (laundry, kiosk, sewing, parcel delivery, car washing and pharmaceutical goods delivery) as well as Beauty Lab, which will, from now on, enjoy Health & Nutrition Lab's company.

About Unilabs

Unilabs is a leading company in healthcare services, in terms of complementary diagnostics. Present in Portugal since 2006, it is close to people to provide the answers that help to take care of health, through a national network with more than 1000 Care Units in clinical analyses, pathological anatomy, cardiology, gastroenterology, medical genetics, nuclear medicine and radiology. In Portugal, it performs around 22 million medical procedures annually, with 3500 employees, of which more than 500 doctors in 13 laboratory centers.

And because we live daily with the future in mind, scientists, doctors and technicians work with the most advanced technology to produce the best healthcare solutions.

This is Unilabs chemistry. Chemistry with people, science and health, which unites us in the daily search for the best diagnoses and solutions for health with a better future.
