Flagged items

1 flagged

1. Allergen identification

Does this product contain any of the 23 allergens?

Yes

1. Allergen identification

1 flagged, 6 / 7 (85.71%)

The 23 Schedule 9 allergens:

fish, crustacean, mollusc, egg, milk, wheat, barley, oats, rye, lupin, peanut, soy, sesame, almond, Brazil nut, cashew, hazelnut, macadamia, pecan, pine nut, pistachio, walnut, sulphites

Does this product contain any of the 23 allergens?	Yes
Which allergens does it contain?	soy
Are any of the allergens in your additives, processing aids or compound ingredients?	No
Is every allergen found declared on the label?	Yes
Is each allergen declared by its required name, with no group or vague terms? **For example "cashew" not "tree nuts", or "crustacean" not "shellfish".**	Yes
Are barley, oats and rye declared only where they contain gluten?	Yes
Are sulphites declared where added at 10 mg/kg or more?	Yes
Is any exemption relied on valid and backed by a supplier specification?	Yes

2. Ingredient list	5 / 5 (100%)
Does each allergen appear under its required name, not a hidden name? For example, "whey (milk)" is fine, but "whey" alone isn't.	Yes
Is the required name bold, with distinct contrast to the other text?	Yes
Is the bold name at least as large as the other ingredient text?	Yes
Is the required name a separate word, e.g. peanut butter rather than "peanutbutter"?	Yes
Is wheat declared as "wheat", including hybrids such as triticale?	Yes

3. Summary statement	7 / 7 (100%)
Does the summary statement start with "Contains"?	Yes
Does the summary statement list every allergen from the ingredient list?	Yes
Does the summary statement include "gluten"?	Yes
Is the summary statement only "Contains" followed by allergen names?	Yes
Is the summary statement in bold and the same typeface and size as the bold names in the ingredient list??	Yes
Is the summary statement directly next to the ingredient list, so both are in view at once?	Yes
Is the summary statement clearly separated from the ingredient list, for example on its own line?	Yes

4. Special cases	4 / 4 (100%)
If there's no ingredient list, are allergens declared elsewhere on the label using the required names?	Yes
For food sold without a label, is allergen information displayed with the food or available on request?	Yes
Do bee pollen, propolis or royal jelly products carry the required warning statement?	Yes
If a "may contain" statement is used, has it been risk-assessed and kept separate from the declaration?	Yes

5. Label control and release	6 / 6 (100%)
Was the artwork checked against the recipe and approved by a named person?	Yes
Was a printed sample from the first run checked, not just the proof?	Yes
Is the right label loaded for this product?	Yes
Has packaging printed before the PEAL rules been removed? (The stock-in-trade period ended in late February 2026.)	Yes
Are failures actioned with an owner, due date and recheck?	Yes
Is the check signed off, with a photo attached?	Yes
Photo of signed-off check
