4. Performance of Basket of Underlying Equities, explanation of effect on value of investment and associated risks and other information concerning the Basket of Underlying Equities

The Non-Protected Knock-in Put Redemption Amount of the Notes issued at par, is linked to the performance of the underlying stocks. The notes are complex financial products with potential full downside risk if (any of the) underlying stocks depreciates by more than 30% of its initial price.

The redemption price of the notes is determined by the development of the underlying stocks. The notes have a maturity between 1 and 6 years. On each of the Autocall Valuation Dates (if the notes have not been auto called on one of the prior Autocall Valuation Dates), the level of the underlying stocks is observed. If the closing price of each of the underlying stocks is at or above the corresponding autocall barrier for such Autocall Valuation Date, the notes will be auto-called and the redemption price of 100.00% is paid out on the following Early Redemption Date. If the notes are not auto-called and any of the underlying stocks depreciates by more than 30% as measured on the Final Valuation Date, then the Final Redemption Amount of the notes equals the performance of the lowest/worst performing underlying stock.

The coupon of the notes is determined by the development of the underlying stocks. On each of the Interest Determination Dates (provided that the notes have not been auto-called on one of the prior Interest Determination Dates), the level of each underlying stock is observed. If the closing price of each of the underlying stocks is at or above 100% of its close price on the Initial Valuation Date, the coupon is calculated as (i) the numerical value of the observation date (4, 5, 6 ... 24) multiplied by INDICATIVELY 5.00% (*to be determined no later than on the Issue Date, subject to a minimum of 4.3 per cent.*) MINUS the sum of interest (if any) paid prior to the relevant Interest Determination Date. The coupon is only paid out once if auto-called. If the closing price of one or more of the underlying stocks is strictly below 100%, no coupon is paid on that Interest Determination Date.

On the Final Valuation Date (provided that the notes have not been auto-called on one of the prior Interest Determination Dates), if the level of the Relevant Performance is at or above 70% but below 100% of its price on the initial valuation date, a bullet coupon is paid out. The amount of that bullet coupon equals

24 times the Specified Rate, divided by 2. In other words, in that case the investor receives half of the total accumulated coupons.

2.3 What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

Credit risk: The risk of losses because debtors fail to meet all or part of their payment obligations to the Group. Credit risk includes counterparty credit risk. Counterparty credit risk arises as a combination of credit risk (a deterioration in the creditworthiness of a counterparty) and market risk (the potential value of derivatives contracts). Danske Bank Group takes on counterparty credit risk when it enters into derivatives transactions (interest rate, foreign exchange, equity and credit contracts) and securities-financing transactions.

Market risk: The risk of losses or gains caused by changes in the market values of the Group's financial assets, liabilities and off-balance-sheet items resulting from changes in market prices or rates. Market risk affects the Group's financial statements through the valuation of on-balance-sheet and off-balance-sheet items: some of the Group's financial instruments, assets and liabilities are valued on the basis of market prices, while others are valued on the basis of market prices and valuation models developed by the Group. In addition, net interest income generated through the non-trading portfolio will be affected by the level of interest rates.

Liquidity, funding and capital risk: The risk that the Group has to issue liabilities or own funds at excessive costs, is unable to pursue its business strategy due to balance sheet requirements and restrictions, or the Group ultimately cannot fulfil its payment obligations due to lack of funds. Liquidity risk is the risk that a lack of funding leads to excessive costs or prevents the Group from maintaining its business model or fulfilling its payment obligations. Capital risk is the risk of not having enough capital to cover all material risks arising from the Group's chosen business strategy.

Insurance and pension risk: Danske Bank Group's insurance and pension risk consists of the risks originating from its ownership of Danica Pension. This includes market risk, life insurance risk and operational risk. As part of its product offerings, Danica Pension provides guaranteed life annuities; insurance against death, disability and accident; and cover against adverse investment returns. This exposes the Group to underwriting risks such as longevity and disability risks as well as to market risk. Underwriting risk is the risk of losses from the insurance business. At Danica Pension, these risks are almost exclusively life insurance risks, and they arise naturally out of the business model. Most underwriting risks materialise over long time horizons during which the gradual changes in biometric conditions deviate from those assumed in contract pricing.

Non-financial risk: The risk of financial losses or gains, regulatory impact, reputational impact or customer impact resulting from inadequate or failed internal processes or from people, systems or external events, including legal and compliance risks. Non-financial risk consists of operational risk, financial crime risk, conduct risk, technology risk, model risk as well as financial control and strategic risk.

3. KEY INFORMATION ON THE SECURITIES

3.1 *What are the main features of the securities?*

The Notes are Equity-Linked Notes due 07 June 2028 (subject to adjustment), with International Securities Identification Number (ISIN) FI4000519269. The currency of this Series of Notes is EUR.

The Notes have a Specified Denomination of EUR 1,000.00 and the Notes may be subscribed in a minimum lot of 5 Notes.

The Rights attached to the Notes

Performance of Basket of Underlying Equities, explanation of effect on value of investment and associated risks and other information concerning the Basket of Underlying Equities:

The Non-Protected Knock-in Put Redemption Amount of the Notes issued at par, is linked to the performance of the underlying stocks. The notes are complex financial products with potential full downside risk if (any of the) underlying stocks depreciates by more than 30% of its initial price.

The redemption price of the notes is determined by the development of the underlying stocks. The notes have a maturity between 1 and 6 years. On each of the Autocall Valuation Dates (if the notes have not been auto called on one of the prior Autocall Valuation Dates), the level of the underlying stocks is observed. If the closing price of each of the underlying stocks is at or above the corresponding autocall barrier for such Autocall Valuation Date, the notes will be auto-called and the redemption price of 100.00% is paid out on the following Early Redemption Date. If the notes are not auto-called and any of the underlying stocks depreciates by more than 30% as measured on the Final Valuation Date, then the Final Redemption Amount of the notes equals the performance of the lowest/worst performing underlying stock.

The coupon of the notes is determined by the development of the underlying stocks. On each of the Interest Determination Dates (provided that the notes have not been auto-called on one of the prior Interest Determination Dates), the level of each underlying stock is observed. If the closing price of each of the underlying stocks is at or above 100% of its close price on the Initial Valuation Date, the coupon is calculated as (i) the numerical value of the observation date (4, 5, 6 ... 24) multiplied by INDICATIVELY 5.00% (*to be determined no later than on the Issue Date, subject to a minimum of 4.3 per cent.*) MINUS the sum of interest (if any) paid prior to the relevant Interest Determination Date. The coupon is only paid out once if auto-called. If the closing price of one or more of the underlying stocks is strictly below 100%, no coupon is paid on that Interest Determination Date.

On the Final Valuation Date (provided that the notes have not been auto-called on one of the prior Interest Determination Dates), if the level of the Relevant Performance is at or above 70% but below 100% of its price on the initial valuation date, a bullet coupon is paid out. The amount of that bullet coupon equals 24 times the Specified Rate, divided by 2. In other words, in that case the investor receives half of the total accumulated coupons.

Under the terms of the Notes, certain dates may be adjusted if the date specified is either not a business day or not a trading day. Any adjustments may affect the return (if any) you receive. The terms of the Notes also provide that if certain exceptional events occur (1) adjustments may be made to the Notes and/or (2) the Issuer may terminate the Notes early. These events principally relate to the Basket of Underlying Equities, the Notes and the Issuer. The return (if any) you receive on such early termination is likely to be different from the scenarios described above and may be less than the amount you invested.

Ratings: The Issuer has been rated by each of S&P Global Ratings Europe Limited (“**S&P**”), Fitch Ratings Limited (“**Fitch**”), and Moody’s Investors Service Limited (“**Moody’s**”) as follows:

long-term Issuer default rating	S&P: A+	Fitch: A	Moody's: A3
short-term Issuer default rating	S&P: A-1	Fitch: F1	Moody's: P-2

A security rating is not a recommendation to buy, sell or hold securities and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency.

Transferability of the Notes: There are no restrictions on the free transferability of the Notes, subject to the offering and selling restrictions of the United States, the EEA, the United Kingdom, Germany, Denmark, Finland, Norway and Sweden and the laws of any jurisdiction in which the Notes are offered or sold.

Status (Ranking): This Series of Notes is issued on a senior basis. The Notes will constitute direct, unconditional, unsubordinated and unsecured obligations of the Issuer and will rank pari passu without any preference among themselves and at least pari passu with all other ordinary, non-preferred, unsubordinated and unsecured obligations of the Issuer, present and future save for certain mandatory exceptions provided by law. Holders of the Notes may be subject to write-down or conversion into equity on any application of the general bail-in tool under EU Directive 2014/59/EU (“**BRRD**”) which may result in holders losing some or all of their investment.

Taxation: The Issuer shall not be liable for or otherwise obliged to pay any tax, duty, withholding or other payment which may arise as a result of the ownership, transfer, presentation and surrender for payment of any Note and all payments made by the Issuer shall be made subject to any tax, duty, withholding or other payment which may be required to be made, paid, withheld or deducted.

Negative pledge and cross default: The terms of the Notes will not have the benefit of a negative pledge or a cross-default.

Events of default: The terms of the Notes will contain, amongst others, the following events of default and following any such event the Notes will be repayable at their early redemption amount: (i) default in payment of any principal or interest due in respect of the Notes, continuing for a period of 5 days after the date on which notice has been given to the Issuer; (ii) default in the performance or observance of any other obligation of the Issuer under the Notes and such default remains unremedied for 30 days after notice requiring remedy has been given to the Issuer; (iii) a legal process is levied or enforced or sued out upon or against any part of the assets of the Issuer which is material in its effect upon the operation of the Issuer and is not discharged or stayed within 60 days of having been so levied, enforced or sued out, (iv) events relating to the bankruptcy of the Issuer; and (v) the Danish Financial Supervisory Authority files a petition for the suspension of payments of the Issuer.

Meetings: The terms of the Notes will contain provisions for calling meetings of holders to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Governing Law: English law, except that the registration of the Notes in Euroclear Finland Oy shall be governed by Finnish law.

Representative of holders: Not Applicable – no representative of Noteholders has been appointed by the Issuer.

3.2 Where will the securities be traded?

Application will be made by the Issuer (or on its behalf) for the Notes to be admitted to trading on the regulated market of the Euronext Dublin.

3.3 What are the key risks that are specific to the securities?

Risks associated with the Notes include the following:

Liquidity and secondary market risk: the Notes may have no established trading market when issued, and one may never develop. Investors may not be able to sell their Notes easily or at a price greater than the amount invested.

Risk of losing all or some of the investment: many factors are likely to affect the value of and return on the Notes, including interest rates, exchange rates, performance of the reference items and economic, financial and political factors.

The Notes may be modified: the terms of the Notes may be modified without the consent of the investor in certain circumstances. This will not always require the decision of a meeting of investors.

Exchange rate risks: exchange rate movements may adversely impact an investor where the Notes are not denominated in the investor's own currency and the imposition of exchange controls could result in an investor not receiving payment on the Notes.

Risk of adjustment or early redemption following a disruption or additional disruption event: in this case any adjustments made or an early redemption of the Notes at the early redemption amount may not be a favourable outcome for investors.

Risk of volatility: movements in the price of the equity securities may be subject to significant fluctuations. The timing of this may adversely affect the return to investors, even if the average level is consistent with their expectations.

Investors have no claim against the reference item: investors are exposed to the performance of the relevant reference item but will have no recourse to such reference item or to the issuer or sponsor of the reference item.

2.3 Vilka nyckelrisker är specifika för Emittenten?

Emittenten är utsatt för följande nyckelrisker:

Kreditrisk: Risken för förluster orsakat av att gäldenärer inte uppfyller hela eller delar av sina betalningsförpliktelser gentemot Koncernen. Kreditrisk inkluderar motpartskreditrisk. Motpartskreditrisk uppkommer genom en kombination av kreditrisk (en försäkring av motpartens kreditvärdighet) och marknadsrisk (det potentiella värdet av derivatkontrakt). Danske Bank Group tar på sig motpartskreditrisk när den ingår derivattransaktioner (ränte-, valuta-, aktie och kreditkontrakt) och värdepappersfinansieringstransaktioner.

Marknadsrisk: Risken för förluster eller vinster orsakade av förändringar i marknadsvärden för Koncernens finansiella tillgångar, skulder och poster utanför balansräkningen till följd av förändringar i marknadspriser eller kurser. Marknadsrisk påverkar Koncernens finansiella rapporter genom värderingen av poster upptagna på balansräkningen och poster utanför balansräkningen: vissa av Koncernens finansiella instrument, tillgångar och skulder är värderade efter marknadspriser, medan andra är värderade efter marknadspriser och värderingsmodeller utvecklade inom Koncernen. Utöver detta kommer nettointäkter genererade från den icke-handlade portföljen att påverkas av räntenivåerna.

Likviditets-, finansierings- och kapitalrisk: Risken för att Koncernen måste emittera skulder eller eget kapital till betydande kostnader, inte kan följa sin affärsstrategi på grund av balansräkningskrav och begränsningar, eller att Koncernen inte kan uppfylla sina betalningsförpliktelser på grund av brist på medel. Likviditetsrisk är risken att en frånvaro av finansiering leder till betydande kostnader eller förhindrar Koncernen att upprätthålla dess affärsmodell eller fullgöra sina betalningsåtaganden. Kapitalrisk är risken för att inte ha tillräckligt med kapital för att täcka materiella risker uppkomna genom Koncernens valda affärsstrategi.

Försäkrings- och pensionsrisk: Danske Bank-Koncernens försäkrings- och pensionsrisk består av de risker som härrör från ägandet av Danica Pension. Detta inkluderar marknadsrisk, livförsäkringsrisk och operativ risk. Som en del i dess produkt erbjudanden tillhandahåller Danica Pension garanterad livränta; försäkring mot döden, invaliditet och olycka; och täcker negativa investeringsavkastningar. Detta exponerar Koncernen mot försäkringsrisker så som livfallrisker och invaliditetsrisker såväl som marknadsrisk. Försäkringsrisker är risken för förluster inom försäkringsverksamheten. På Danica Pension är dessa risker nästan enbart livförsäkringsrisker, och de framträder naturligt som en följd av affärsmodellen. De flesta försäkringsriskerna materialiseras över långa tidshorisonter genom vilka gradvisa förändringar i biometriska tillstånd avviker från de förväntade i prissättningen av avtalen.

Icke-finansiell risk: Risken för ekonomiska förluster eller vinster, inverkan av lagstiftning, påverkan på renommé eller kundpåverkan till följd av otillräckliga eller misslyckade interna processer eller från personer, system eller externa händelser, inklusive juridiska- och regelefterlevnadsrisker. Icke-finansiella risker består av verksamhetsrisk, ekonomisk brottslighetsrisk, uppföranderisk, teknologisk, affärsmodellrisk såväl som finansiell kontrollrisk och strategisk.

Rättigheter tillkommande Obligationerna

Utveckling av Korg med underliggande aktier, förklaring av påverkan på värdet av investeringen och medföljande risker och övrig information rörande Korg med underliggande aktier:

Det icke kapitalskyddade knock-in inlösenbeloppet med sälloptionskaraktär för obligationerna som emitteras till par är kopplat till utvecklingen av underliggande aktier. Obligationerna är komplexa finansiella produkter med full nedsiderisk för det fall (någon av de) underliggande aktierna förlorar mer än 30% av dess initiala pris.

Obligationernas inlösenbelopp bestäms utifrån utvecklingen av de underliggande aktier. Obligationerna löper mellan 1 och 6 år. För varje autocall-värderingsdag (för det fall obligationerna inte tidigare har autocallats på någon av de tidigare autocall-värderingsdagarna, observeras nivån för de underliggande aktier. Ifall slutpriset för vardera underliggande aktie är lika med eller överstiger motsvarande autocall-barriär för sådan autocall-värderingsdag ska obligationerna autocallas och ett inlösenpris om 100,00% betalas följande förtida inlösendag. För det fall obligationerna inte autocallas och värdet på någon av de underliggande aktierna minskas med mer än 30% så som beräknat på den slutliga värderingsdagen ska det slutliga inlösenbeloppet för obligationerna motsvara utvecklingen av den underliggande aktie med lägst/sämst utveckling..

Kupongen på obligationerna bestäms efter utvecklingen av de underliggande aktie. På varje räntebestämningsdag (förutsatt att obligationerna inte har autocallats på någon av de tidigare räntebestämningsdagarna) observeras nivån för varje underliggande aktie. För det fall slutpriset för vardera underliggande aktie är lika med eller överstiger 100% av dess slutpris på den första värderingsdagen ska kupongen beräknas som (i) det numeriska värdet av observationsdagen (4, 5, 6 ... 24) multiplicerat med INDIKATIVT 5,00% (*bestäms av Emittenten senast på Emissionsdagen, minst 4.3 procent.*) MINUS summan av utbetalad ränta (om någon) utbetalad före den relevanta räntebestämningsdagen. Kupongen betalas endast ut en gång om autocallad. För det fall slutpriset för en eller flera av de underliggande aktierna understiger 100% betalas ingen kupong ut på den räntebestämningsdagen.

För det fall relevant utveckling på den slutliga värderingsdagen (förutsatt att obligationerna inte har autocallats på någon av de föregående räntebestämningsdagarna), är lika med eller överstiger 70% men understiger 100% av priset på den första värderingsdagen betalas en bulletkupong ut. Beloppet på en sådan bulletkupong är lika med 24 gånger den specificerade räntan, dividerat med 2. Med andra ord mottar investeraren i det fallet hälften av de ackumulerade kupongerna.

3.2 Var kommer värdepapperen att handlas?

Ansökan har gjorts av Emittenten (eller för dess räkning) för att ta upp Obligationerna till handel på den reglerade marknaden Euronext Dublin.

3.3 Vilka nyckelrisker är specifika för värdepapperen?

Riskerna som är förknippade med Obligationerna är följande:

Likviditets- och andrahandsmarknadsrisk: det finns risk för att det inte finns någon andrahandsmarknad för Obligationerna när dessa emitteras och det är möjligt att en sådan aldrig utvecklas. Det är möjligt att investerare inte på ett enkelt sätt eller till ett pris högre än det investerade kommer att kunna sälja sina Obligationer.

Risk att förlora hela eller delar av investeringen: många faktorer kommer sannolikt att påverka värdet och avkastningen av Obligationen, däribland inkluderat ränta, valutaväxlingskurser, utveckling av referensobjekt och ekonomiska, finansiella och politiska faktorer.

Obligationerna kan ändras: villkoren för Obligationerna kan i vissa fall ändras utan investerarens godkännande. En sådan ändring kommer inte alltid att fordra beslut genom innehavarmöte.

Valutakursrisker: valutakursrörelser kan påverka en investerare negativt där Obligationerna inte är denominerade i investerarens egen valuta och införandet av valutakontroller kan leda till att en investerare inte får betalning på dessa Obligationer.

Risken för justering eller förtida inlösen som följer en avbrottshändelse eller ytterligare avbrottshändelse: i detta fall ska alla justeringar gjorda, eller en förtida inlösen av Obligationerna för det förtida inlösenbeloppet, inte resultera i något gynnsamt resultat för investerare.

Volatilitetsrisk: rörelser i priset för aktierna kan bli föremål för betydande fluktuationer. Timingen för dessa rörelser kan negativt påverka avkastningen till investerare, även ifall den genomsnittliga nivån är konsekvent med dess förväntningar.

Investerare har inga rättigheter gentemot referensobjektet: investerare är exponerade mot utvecklingen av relevant referensobjekt men kommer inte ha någon regressrätt mot sådant referensobjekt eller gentemot emittenten eller sponsorn av referensobjektet.
