The Securities are offered to the public in Finland from 8 August 2018 to 31 August 2018.

Any person making or intending to make an offer of the Securities may only do so :

- (i) in those Non-exempt Offer Jurisdictions mentioned in Paragraph 47 of Part A below, provided such person is a Manager or an Authorised Offeror (as such term is defined in the Base Prospectus) and that the offer is made during the Offer Period specified in that paragraph and that any conditions relevant to the use of the Base Prospectus are complied with; or
- (ii) otherwise in circumstances in which no obligation arises for the Issuer or any Manager to publish a prospectus pursuant to Article 3 of the Prospectus Directive or to supplement a prospectus pursuant to Article 16 of the Prospectus Directive, in each case, in relation to such offer.

None of the Issuer nor, the Guarantor or any Manager has authorised, nor do they authorise, the making of any offer of Securities in any other circumstances.

Investors should note that if a supplement to or an updated version of the Base Prospectus referred to below is published at any time during the Offer Period (as defined below), such supplement or updated base prospectus, as the case may be, will be published and made available in accordance with the arrangements applied to the original publication of these Final Terms. Any investors who have indicated acceptances of the Offer (as defined below) prior to the date of publication of such supplement or updated version of the Base Prospectus, as the case may be, (the "**Publication Date**") have the right within two working days of the Publication Date to withdraw their acceptances.

PART A - CONTRACTUAL TERMS

Terms used herein shall be deemed to be defined as such for the purposes of the Conditions set forth in the Base Prospectus dated 5 June 2018, which constitutes a base prospectus for the purposes of Directive 2003/71/EC (the "**Prospectus Directive**") (the "**Base Prospectus**"). This document constitutes the Final Terms of the Securities described herein for the purposes of Article 5.4 of the Prospectus Directive and must be read in conjunction with the Base Prospectus. Full information on BNP Paribas Issuance B.V. (the "**Issuer**") and the offer of the Securities is only available on the basis of the combination of these Final Terms and the Base Prospectus. A summary of the Securities (which comprises the Summary in the Base Prospectus as amended to reflect the provisions of these Final Terms) is annexed to these Final Terms.

The Base Prospectus is available for viewing on <http://eqdpo.bnpparibas.com/FI4000343488> and copies may be obtained free of charge at the specified offices of the Security Agents. The Base Prospectus will also be available on the AMF website www.amf-france.org.

References herein to numbered Conditions are to the terms and conditions of the relevant series of Securities and words and expressions defined in such terms and conditions shall bear the same meaning in these Final Terms in so far as they relate to such series of Securities, save as where otherwise expressly provided.

These Final Terms relate to the series of Securities as set out in "Specific Provisions for each Series" below. ISSUE SPECIFIC SUMMARY OF THE PROGRAMME IN RELATION TO THIS BASE PROSPECTUS

Summaries are made up of disclosure requirements known as "Elements". These Elements are numbered in Sections A – E (A.1 – E.7). This Summary contains all the Elements required to be included in a summary for this type of Securities, Issuer and Guarantor. Because some Elements are not required to be addressed, there may be gaps in the numbering sequence of the Elements. Even though an Element may be required to be inserted in the summary because of the type of Securities, Issuer and Guarantor(s), it is possible that no relevant information can be given regarding the Element. In this case a short description of the Element should be included in the summary explaining why it is not applicable.

Section A - Introduction and warnings

Element	Title	
A.1	Warning that the summary should be read as an introduction and provision as to claims	This summary should be read as an introduction to the Base Prospectus and the applicable Final Terms. In this summary, unless otherwise specified and except as used in the first paragraph of Element D.3, "Base Prospectus" means the Base Prospectus of BNPP B.V. and BNPP dated 5 June 2018 as supplemented from time to time under the Note, Warrant and Certificate Programme of BNPP B.V., BNPP and BNP Paribas Fortis Funding. In the first paragraph of Element D.3, "Base Prospectus" means the Base Prospectus of BNPP B.V. and BNPP dated 5 June 2018 under the Note, Warrant and Certificate Programme of BNPP B.V., BNPP and BNP Paribas Fortis Funding. Any decision to invest in any Securities should be based on a consideration of the Base Prospectus as a whole, including any documents incorporated by reference and the applicable Final Terms. Where a claim relating to information contained in the Base Prospectus and the applicable Final Terms is brought before a court in a Member State of the European Economic Area, the plaintiff may, under the national legislation of the Member State where the claim is brought, be required to bear the costs of translating the Base Prospectus and the applicable Final Terms before the legal proceedings are initiated. No civil liability will attach to the Issuer or the Guarantor in any such Member State solely on the basis of this summary, including any translation hereof, unless it is misleading, inaccurate or inconsistent when read together with the other parts of the Base Prospectus and the applicable Final Terms or, following the implementation of the relevant provisions of Directive 2010/73/EU in the relevant Member State, it does not provide, when read together with the other parts of the Base Prospectus and the applicable Final Terms, key information (as defined in Article 2.1(s) of the Prospectus Directive) in order to aid investors when considering whether to invest in the Securities.
A.2	Consent as to use the Base Prospectus, period of validity and other conditions attached	Consent: Subject to the conditions set out below, the Issuer consents to the use of the Base Prospectus in connection with a Non-exempt Offer of Securities by the Managers and Alexandria Markets Oy and Alexandria Pankkiiriliike Oyj and identified as an Authorised Offeror in respect of the relevant Non-exempt Offer. Offer period: The Issuer's consent referred to above is given for Non-exempt Offers of Securities from <u>8 August 2018 to 31 August 2018</u> (the "Offer Period"). Conditions to consent: The conditions to the Issuer's consent are that such consent (a) is only valid during the Offer Period; and (b) only extends to the use of the Base Prospectus to make Non-exempt Offers of the relevant Tranche of Securities in Finland.
		AN INVESTOR INTENDING TO PURCHASE OR PURCHASING ANY SECURITIES IN A NON-EXEMPT OFFER FROM AN AUTHORISED OFFEROR WILL DO SO, AND OFFERS AND SALES OF SUCH SECURITIES TO AN INVESTOR BY SUCH AUTHORISED OFFEROR WILL BE MADE, IN ACCORDANCE WITH THE TERMS AND CONDITIONS OF THE OFFER IN PLACE BETWEEN SUCH AUTHORISED OFFEROR AND SUCH INVESTOR INCLUDING ARRANGEMENTS IN RELATION

Element	Title	
		TO PRICE, ALLOCATIONS, EXPENSES AND SETTLEMENT. THE RELEVANT INFORMATION WILL BE PROVIDED BY THE AUTHORISED OFFEROR AT THE TIME OF SUCH OFFER.

B.15	Principal activities	The principal activity of the Issuer is to issue and/or acquire financial instruments of any nature and to enter into related agreements for the account of various entities within the BNPP Group.
B.16	Controlling shareholders	BNP Paribas holds 100 per cent. of the share capital of BNPP B.V.
B.17	Solicited credit ratings	BNPP B.V.'s long term credit rating are A with a stable outlook (Standard & Poor's Credit Market Services France SAS) and BNPP B.V.'s short term credit rating are A-1 (Standard & Poor's Credit Market Services France SAS). The Securities have not been rated. A security rating is not a recommendation to buy, sell or hold securities and may be subject to suspension, reduction or withdrawal at any time by the assigning rating agency.
B.18	Description of the Guarantee	The Securities will be unconditionally and irrevocably guaranteed by BNP Paribas (" BNPP " or the " Guarantor ") pursuant to an English law deed of guarantee executed by BNPP on or around 5 June 2018 (the " Guarantee "). In the event of a bail-in of BNPP but not BNPP B.V., the obligations and/or amounts owed by BNPP under the guarantee shall be reduced to reflect any such modification or reduction applied to liabilities of BNPP resulting from the application of a bail-in of BNPP by any relevant regulator (including in a situation where the Guarantee itself is not the subject of such bail-in). The obligations under the guarantee are senior preferred obligations (within the meaning of Article L.613-30-3-I-3° of the French <i>Code monétaire et financier</i>) and unsecured obligations of BNPP and will rank <i>pari passu</i> with all its other present and future senior preferred and unsecured obligations subject to such exceptions as may from time to time be mandatory under French law.
B.19	Information about the Guarantor	
B.19/ B.1	Legal and commercial name of the Guarantor	BNP Paribas.
B.19/ B.2	Domicile/ legal form/ legislation/ country of incorporation	The Guarantor was incorporated in France as a <i>société anonyme</i> under French law and licensed as a bank having its head office at 16, boulevard des Italiens - 75009 Paris, France.
B.19/ B.4b	Trend information	Macroeconomic environment Macroeconomic and market conditions affect BNPP's results. The nature of BNPP's business makes it particularly sensitive to macroeconomic and market conditions in Europe, which have been at times challenging and volatile in recent years. In 2017, global growth increased to about 3.5%, reflecting an improvement in all geographic regions. In the large developed countries, this increase in activity is leading to a tightening of, or a tapering of accommodating monetary policy. However, with inflation levels still very moderate, the central banks are able to manage this transition very gradually, without compromising the economic outlook. The IMF expects worldwide growth to strengthen further in 2018 and has revised its forecast

Element	Title	
		from +3.6% to +3.7%: the slight slowing down expected in the advanced economies should be more than offset by the forecast improvement in the emerging economies (driven by the recovery in Latin America and the Middle East, and despite the structural lower pace of economic growth in China). In this context, the following two risk categories can be identified: <i>Risks of financial instability due to the conduct of monetary policies</i> Two risks should be emphasised: a sharp increase in interest rates and the current very accommodating monetary policy being maintained for too long. On the one hand, the continued tightening of monetary policy in the United States (which started in 2015) and the less-accommodating monetary policy in the euro zone (a planned reduction in assets purchases starting in January 2018) involve risks of financial turbulence. The risk of an inadequately controlled rise in long-term interest rates may in particular be emphasised, under the scenario of an unexpected increase in inflation or an unanticipated tightening of monetary policies. If this risk materialises, it could have negative consequences on the asset markets, particularly those for which risk premiums are extremely low compared to their historic average, following a decade of accommodating monetary policies (credit to non-investment grade corporates or countries, certain sectors of the equity markets, real estate, etc.) On the other hand, despite the upturn since mid-2016, interest rates remain low, which may continue to encourage excessive risk-taking among some players in the financial systemmarket participants: increased lengthening maturities of financings and assets held, less stringent credit policy for granting loans, and an increase in leveraged financings. Some players of these participants (insurance companies, pension funds, asset managers, etc.) entail have an increasingly systemic dimension and in the event of market turbulence (linked for instance example to a sudden sharp rise in interest rates and/or a sharp price correction) they may decide could be brought to unwind large positions in an environment of relatively weak market liquidity. <i>Systemic risks related to increased debt</i> Macroeconomically, the impact of a rate increase could be significant for countries with high public and/or private debt-to-GDP. This is particularly the case for the United States and certain European countries (in particular Greece, Italy, and Portugal), which are posting public debt-to-GDP ratios often above 100% but also for emerging countries. Between 2008 and 2017, the latter recorded a marked increase in their debt, including foreign currency debt owed to foreign creditors. The private sector was the main source of the increase in this debt, but also the public sector to a lesser extent, particularly in Africa. These countries are particularly vulnerable to the prospect of a tightening in monetary policies in the advanced economies. Capital outflows could weigh on exchange rates, increase the costs of servicing that debt, import inflation, and cause the emerging countries' central banks to tighten their credit conditions. This would bring about a reduction in forecast economic growth, possible downgrades of sovereign ratings, and an increase in risks for the banks. While the exposure of the BNP Paribas Group to emerging countries is limited, the vulnerability of these economies may generate disruptions in the global financial system that could affect the Group and potentially alter its results. It should be noted that debt-related risk could materialise, not only in the event of a sharp rise in interest rates, but also with any negative growth shocks. <i>Laws and regulations applicable to financial institutions</i> Recent and future changes in the laws and regulations applicable to financial institutions may have a significant impact on BNPP. Measures that were recently adopted or which are (or whose application measures are) still in draft format, that have or are likely to have an impact on BNPP notably include:

Element	Title	
		- the structural reforms comprising the French banking law of 26 July 2013 requiring that banks create subsidiaries for or segregate "speculative" proprietary operations from their traditional retail banking activities, the "Volcker rule" in the US which restricts proprietary transactions, sponsorship and investment in private equity funds and hedge funds by US and foreign banks, and upcoming potential changes in Europe; - regulations governing capital: the Capital Requirements Directive IV ("CRD 4")/the Capital Requirements Regulation ("CRR"), the international standard for total-loss absorbing capacity ("TLAC") and BNPP's designation as a financial institution that is of systemic importance by the Financial Stability Board; - the European Single Supervisory Mechanism and the ordinance of 6 November 2014; - the Directive of 16 April 2014 related to deposit guarantee systems and its delegation and implementing Decrees, the Directive of 15 May 2014 establishing a Bank Recovery and Resolution framework, the Single Resolution Mechanism establishing the Single Resolution Council and the Single Resolution Fund; - the Final Rule by the US Federal Reserve imposing tighter prudential rules on the US transactions of large foreign banks, notably the obligation to create a separate intermediary holding company in the US (capitalised and subject to regulation) to house their US subsidiaries; - the new rules for the regulation of over-the-counter derivative activities pursuant to Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act, notably margin requirements for uncleared derivative products and the derivatives of securities traded by swap dealers, major swap participants, security-based swap dealers and major security-based swap participants, and the rules of the US Securities and Exchange Commission which require the registration of banks and major swap participants active on derivatives markets as well as transparency and reporting on derivative transactions; - the new Markets in Financial Instruments Directive ("MiFID") and Markets in Financial Instruments Regulation ("MiFIR"), and European regulations governing the clearing of certain over-the-counter derivative products by centralised counterparties and the disclosure of securities financing transactions to centralised bodies. - the General Data Protection Regulation ("GDPR") that became effective on 25 May 2018, moving the European data confidentiality environment forward and improving personal data protection within the European Union. Businesses run the risk of severe penalties if they do not comply with the standards set by the GDPR. This Regulation applies to all banks providing services to European citizens; and - the finalisation of Basel 3 published by the Basel committee in December 2017, introducing a revision to the measurement of credit risk, operational risk and credit valuation adjustment ("CVA") risk for the calculation of risk-weighted assets. These measures are expected to come into effect in January 2022 and will be subject to an output floor (based on standardised approaches), which will be gradually applied as of 2022 and reach its final level in 2027. Moreover, in today's tougher regulatory context, the risk of non-compliance with existing laws and regulations, in particular those relating to the protection of the interests of customers, is a significant risk for the banking industry, potentially resulting in significant losses and fines. In addition to its compliance system, which specifically

Element	Title																									
		covers this type of risk, the BNP Paribas Group places the interest of its customers, and more broadly that of its stakeholders, at the heart of its values. The new Code of conduct adopted by the BNP Paribas Group in 2016 sets out detailed values and rules of conduct in this area. Cyber security and technology risk BNPP's ability to do business is intrinsically tied to the fluidity of electronic transactions as well as the protection and security of information and technology assets. The technological change is accelerating with the digital transformation and the resulting increase in the number of communications circuits, proliferation in data sources, growing process automation, and greater use of electronic banking transactions. The progress and acceleration of technological change are giving cybercriminals new options for altering, stealing, and disclosing data. The number of attacks is increasing, with a greater reach and sophistication in all sectors, including financial services. The outsourcing of a growing number of processes also exposes the Group to structural cyber security and technology risks leading to the appearance of potential attack vectors that cybercriminals can exploit. Accordingly, the Group has set up a second line of defence within the Risk Function with the creation of the Risk ORC ICT Team dedicated to managing cyber security and technology risk. Thus, standards are regularly adapted to support the Bank's digital evolution and innovation while managing existing and emerging threats (such as cyber-crime, espionage, etc.).																								
B.19/B.5	Description of the Group	BNPP is a European leading provider of banking and financial services and has four domestic retail banking markets in Europe, namely in France, Belgium, Italy and Luxembourg. It is present in 73 countries and has more than 196,000 employees, including close to 149,000 in Europe. BNPP is the parent company of the BNP Paribas Group (together, the " BNPP Group ").

	Statements of no significant or material adverse change	
	See Element B.12 above in the case of the BNPP Group.	
	There has been no material adverse change in the prospects of BNPP or the BNPP Group since 31 December 2017 (being the end of the last financial period for which audited financial statements have been published).	
B.19/ B.13	Events impacting the Guarantor's solvency	Not applicable, as at 5 June 2018 and to the best of the Guarantor's knowledge, there have not been any recent events which are to a material extent relevant to the evaluation of the Guarantor's solvency since 31 December 2017.
B.19/ B.14	Dependence upon other Group entities	Subject to the following paragraph, BNPP is not dependent upon other members of the BNPP Group. In April 2004, BNPP began outsourcing IT Infrastructure Management Services to the BNP Paribas Partners for Innovation ("BP²I") joint venture set up with IBM France at the end of 2003. BP²I provides IT Infrastructure Management Services for BNPP and several BNPP subsidiaries in France (including BNP Paribas Personal Finance, BP2S, and BNP Paribas Cardif), Switzerland, and Italy. In mid-December 2011 BNPP renewed its agreement with IBM France for a period lasting until end-2017 and has subsequently renewed the agreement for a period lasting until end-2021. At the end of 2012, the parties entered into an agreement to gradually extend this arrangement to BNP Paribas Fortis as from 2013. The Swiss subsidiary was closed on 31 December 2016. BP²I is under the operational control of IBM France. BNP Paribas has a strong influence over this entity, which is 50/50 owned with IBM France. The BNP Paribas staff made available to BP²I make up half of that entity's permanent staff, its buildings and processing centres are the property of the Group, and the governance in place

		provides BNP Paribas with the contractual right to monitor the entity and bring it back into the Group if necessary. IBM Luxembourg is responsible for Infrastructure services and data production for some of the BNP Paribas Luxembourg entities. BancWest's data processing operations are outsourced to Fidelity Information Services. Cofinoga France's data processing is outsourced to SDDC, a fully-owned IBM subsidiary. See Element B.5 above.
B.19/ B.15	Principal activities	BNP Paribas holds key positions in its two main businesses: • Retail Banking and Services, which includes: • Domestic Markets, comprising: • French Retail Banking (FRB), • BNL banca commerciale (BNL bc), Italian retail banking, • Belgian Retail Banking (BRB), • Other Domestic Markets activities, including Luxembourg Retail Banking (LRB); • International Financial Services, comprising: • Europe-Mediterranean, • BancWest, • Personal Finance, • Insurance, • Wealth and Asset Management; • Corporate and Institutional Banking (CIB), which includes: • Corporate Banking, • Global Markets, • Securities Services.
B.19/ B.16	Controlling shareholders	None of the existing shareholders controls, either directly or indirectly, BNPP. As at 31 December 2017 the main shareholders were Société Fédérale de Participations et d'Investissement ("SFPI") a public-interest <i>société anonyme</i> (public limited company) acting on behalf of the Belgian government holding 7.7% of the share capital, BlackRock Inc. holding 5.1% of the share capital and Grand Duchy of Luxembourg holding 1.0% of the share capital. To BNPP's knowledge, no shareholder other than SFPI and BlackRock Inc. owns more than 5% of its capital or voting rights.
B.19/ B.17	Solicited credit ratings	BNPP's long term credit ratings are A with a stable outlook (Standard & Poor's Credit Market Services France SAS), Aa3 with a stable outlook (Moody's Investors Service Ltd.) and A+ with a stable outlook (Fitch France S.A.S.) and AA (low) with a stable outlook (DBRS Limited) and BNPP's short-term credit ratings are A-1 (Standard & Poor's Credit Market Services France SAS), P-1 (Moody's Investors Service Ltd.), F1

Section D - Risks

Element	Title	
D.2	Key risks regarding the Issuer and the Guarantor	Prospective purchasers of the Securities should be experienced with respect to options and options transactions and should understand the risks of transactions involving the Securities. An investment in the Securities presents certain risks that should be taken into account before any investment decision is made. Certain risks may affect the Issuer's ability to fulfil its obligations under the Securities or the Guarantor's ability to perform its obligations under the Guarantee, some of which are beyond its control. In particular, the Issuer and the Guarantor, together with the BNPP Group, are exposed to the risks associated with its activities, as described below: Guarantor As defined in BNPP's 2017 Registration Document (in English) and Annual Financial Report, eight main categories of risk are inherent in BNPP's activities: (1) <i>Credit Risk</i> - Credit risk is the consequence resulting from the likelihood that a borrower or counterparty will fail to meet its obligations in accordance with agreed terms. The probability of default and the expected recovery on the loan or receivable in the event of default are key components of the credit quality assessment; (2) <i>Securitisation in the banking book</i> - Securitisation means a transaction or scheme, whereby the credit risk associated with an exposure or pool of exposures is tranching, having the following characteristics: - payments made in the transaction or scheme are dependent upon the performance of the exposure or pool of exposures; - the subordination of tranches determines the distribution of losses during the life of the risk transfer. Any commitment (including derivatives and liquidity lines) granted to a securitisation operation must be treated as a securitisation exposure. Most of these commitments are held in the prudential banking book; (3) <i>Counterparty Credit Risk</i> - Counterparty credit risk is the translation of the credit risk embedded in financial transactions, investments and/or settlement transactions between counterparties. Those transactions include bilateral contracts such as over-the-counter ("OTC") derivatives contracts as well as contracts settled through clearing houses. The amount of this risk may vary over time in line with changing market parameters which then

Element	Title	
		impacts the replacement value of the relevant transactions Counterparty risk lies in the event that a counterparty defaults on its obligations to pay BNPP the full present value of the flows relating to a transaction or a portfolio for which BNPP is a net receiver. Counterparty credit risk is also linked to the replacement cost of a derivative or portfolio in the event of counterparty default. Hence, it can be seen as a market risk in case of default or a contingent risk. (4) <i>Market Risk</i> - Market risk is the risk of incurring a loss of value due to adverse trends in market prices or parameters, whether directly observable or not. Observable market parameters include, but are not limited to, exchange rates, prices of securities and commodities (whether listed or obtained by reference to a similar asset), prices of derivatives, and other parameters that can be directly inferred from them, such as interest rates, credit spreads, volatilities and implied correlations or other similar parameters. Non-observable factors are those based on working assumptions such as parameters contained in models or based on statistical or economic analyses, non-ascertainable in the market. In fixed income trading books, credit instruments are valued on the basis of bond yields and credit spreads, which represent market parameters in the same way as interest rates or foreign exchange rates. The credit risk arising on the issuer of the debt instrument is therefore a component of market risk known as issuer risk. Liquidity is an important component of market risk. In times of limited or no liquidity, instruments or goods may not be tradable or may not be tradable at their estimated value. This may arise, for example, due to low transaction volumes, legal restrictions or a strong imbalance between demand and supply for certain assets. The market risk related to banking activities encompasses the interest rate and foreign exchange risks stemming from banking intermediation activities; (5) <i>Liquidity Risk</i> - Liquidity risk is the risk that BNPP will not be able to honour its commitments or unwind or settle a position due to the market environment or idiosyncratic factors (i.e. specific to BNP Paribas), within a given timeframe and at a reasonable cost. Liquidity risk reflects the risk of the BNPP Group being unable to fulfil current or future foreseen or unforeseen cash or collateral requirements, across all time horizons, from the short to the long term This risk may stem from the reduction in funding sources, draw down of funding commitments, a reduction in the liquidity of certain assets, or an increase in cash or collateral margin calls. It may be related to the bank itself (reputation risk) or to external factors (risks in some markets). The BNPP Group's liquidity risk is managed under a global liquidity policy approved by the Group's ALM Committee. This policy is based on management principles designed to apply both in normal conditions and in a liquidity crisis. The Group's liquidity position is assessed on the basis of internal indicators and regulatory ratios. (6) <i>Operational Risk</i> - Operational risk is the risk of incurring a loss due to inadequate or failed internal processes, or due to external events, whether

Element	Title	
		deliberate, accidental or natural occurrences. Management of operational risk is based on an analysis of the "cause - event - effect" chain. Internal processes giving rise to operational risk may involve employees and/or IT systems. External events include, but are not limited to floods, fire, earthquakes and terrorist attacks. Credit or market events such as default or fluctuations in value do not fall within the scope of operational risk. Operational risk encompasses fraud, human resources risks, legal risks, non-compliance risks, tax risks, information system risks, conduct risks (risks related to the provision of inappropriate financial services), risk related to failures in operating processes, including loan procedures or model risks, as well as any potential financial implications resulting from the management of reputation risks; (7) <i>Compliance and Reputation Risk</i> - Compliance risk is defined in French regulations as the risk of legal, administrative or disciplinary sanctions, of significant financial loss or reputational damage that a bank may suffer as a result of failure to comply with national or European laws and regulations, codes of conduct and standards of good practice applicable to banking and financial activities, or instructions given by an executive body, particularly in application of guidelines issued by a supervisory body. By definition, this risk is a sub-category of operational risk. However, as certain implications of compliance risk involve more than a purely financial loss and may actually damage the institution's reputation, BNPP treats compliance risk separately. Reputation risk is the risk of damaging the trust placed in a corporation by its customers, counterparties, suppliers, employees, shareholders, supervisors and any other stakeholder whose trust is an essential condition for the corporation to carry out its day-to-day operations. Reputation risk is primarily contingent on all the other risks borne by BNPP, specifically the potential materialisation of a credit or market risk, or an operational risk, as well as a violation of the Group's code of conduct; (8) <i>Insurance Risks</i> - BNP Paribas Cardif is exposed to the following risks: - underwriting risk: underwriting risk is the risk of a financial loss caused by a sudden, unexpected increase in insurance claims. Depending on the type of insurance business (life, non-life), this risk may be statistical, macroeconomic or behavioural, or may be related to public health issues or disasters; - market risk: market risk is the risk of a financial loss arising from adverse movements of financial markets. These adverse movements are notably reflected in price fluctuations (foreign exchange rates, bonds, equities and commodities, derivatives, real estate, etc.) and derived from fluctuations in interest rates, credit spreads, volatilities and correlations; - credit risk: credit risk is the risk of loss or adverse change in the financial situation resulting from fluctuations in the credit standing of issuers of securities, counterparties and any debtors to which the BNP Paribas Cardif group is exposed. Among the debtors, risks related to financial instruments (including the banks in which the BNP Paribas Cardif group holds deposits) and risks related to receivables generated by the underwriting activities (premium collection, reinsurance recovering, etc.) are divided into two

Element	Title	
		categories: assets credit risk and liabilities credit risk; - liquidity risk: liquidity risk is the risk of being unable to fulfil current or future foreseen or unforeseen cash requirements coming from insurance commitments to policyholders, because of an inability to sell assets in a timely manner; and - operational risk: operational risk is the risk of loss resulting from the inadequacy or failure of internal processes, IT failures or external events, whether accidental or natural. These external events mentioned in this definition include those of human or natural origin. <i>Risks</i> This section summarises the principal risks that BNPP currently considers itself to face. They are presented in the following categories: risks related to the macroeconomic and market environment, regulatory risks and risks related to BNPP, its strategy, management and operations. (a) Difficult market and economic conditions have in the past had and may in the future have a material adverse effect on the operating environment for financial institutions and hence on BNPP's financial condition, results of operations and cost of risk. (b) The United Kingdom's referendum to leave the European Union may lead to significant uncertainty, volatility and disruption in European and broader financial and economic markets and hence may adversely affect BNPP's operating environment. (c) Due to the geographic scope of its activities, BNPP may be vulnerable to country or regional-specific political, macroeconomic and financial environments or circumstances. (d) BNPP's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in credit spreads or other factors. (e) Downgrades in the credit ratings of France or of BNPP may increase BNPP's borrowing cost. (f) Significant interest rate changes could adversely affect BNPP's revenues or profitability. (g) The prolonged low interest rate environment carries inherent systemic risks, and an exit from such environment also carries risks. (h) The soundness and conduct of other financial institutions and market participants could adversely affect BNPP. (i) BNPP may incur significant losses on its trading and investment activities due to market fluctuations and volatility. (j) BNPP may generate lower revenues from brokerage and other commission and fee-based businesses during market downturns.

Element	Title	
		(k) Protracted market declines can reduce liquidity in the markets, making it harder to sell assets and possibly leading to material losses. (l) Laws and regulations adopted in recent years, particularly in response to the global financial crisis, as well as new legislative proposals, may materially impact BNPP and the financial and economic environment in which it operates. (m) BNPP is subject to extensive and evolving regulatory regimes in the jurisdictions in which it operates. (n) BNPP may incur substantial fines and other administrative and criminal penalties for non-compliance with applicable laws and regulations, and may also incur losses in related (or unrelated) litigation with private parties. (o) There are risks related to the implementation of BNPP's strategic plans and commitment to environmental responsibility. (p) BNPP may experience difficulties integrating acquired companies and may be unable to realise the benefits expected from its acquisitions. (q) Intense competition by banking and non-banking operators could adversely affect BNPP's revenues and profitability. (r) A substantial increase in new provisions or a shortfall in the level of previously recorded provisions could adversely affect BNPP's results of operations and financial condition. (s) BNPP's risk management policies, procedures and methods, may leave it exposed to unidentified or unanticipated risks, which could lead to material losses. (t) BNPP's hedging strategies may not prevent losses. (u) Adjustments to the carrying value of BNPP's securities and derivatives portfolios and BNPP's own debt could have an impact on its net income and shareholders' equity. (v) The expected changes in accounting principles relating to financial instruments may have an impact on BNPP's balance sheet, income statement and regulatory capital ratios and result in additional costs. (w) BNPP's competitive position could be harmed if its reputation is damaged. (x) An interruption in or a breach of BNPP's information systems may result in material losses of client or customer information, damage to BNPP's reputation and lead to financial losses. (y) Unforeseen external events may disrupt BNPP's operations and cause substantial losses and additional costs. Issuer

		The main risks described above in relation to BNPP also represent the main risks for BNPP B.V., either as an individual entity or a company in the BNPP Group. <i>Dependency Risk</i> BNPP B.V. is an operating company. The assets of BNPP B.V. consist of the obligations of other BNPP Group entities. The ability of BNPP B.V. to meet its own obligations will depend on the ability of other BNPP Group entities to fulfil their obligations. In respect of securities it issues, the ability of BNPP B.V. to meet its obligations under such securities depends on the receipt by it of payments under certain hedging agreements that it enters with other BNPP Group entities. Consequently, Holders of BNPP B.V. securities will, subject to the provisions of the Guarantee issued by BNPP, be exposed to the ability of BNPP Group entities to perform their obligations under such hedging agreements. <i>Market Risk</i> BNPP B.V. takes on exposure to market risks arising from positions in interest rates, currency exchange rates, commodities and equity products, all of which are exposed to general and specific market movements. However, these risks are hedged by option and swap agreements and therefore these risks are mitigated in principle. <i>Credit Risk</i> BNPP B.V. has significant concentration of credit risks as all OTC contracts are acquired from its parent company and other BNPP Group entities. Taking into consideration the objective and activities of BNPP B.V. and the fact that its parent company is under supervision of the European Central Bank and the Autorité de Contrôle Prudentiel et de Résolution management considers these risks as acceptable. The long term senior debt of BNP Paribas is rated (A) by Standard & Poor's and (Aa3) by Moody's. <i>Liquidity Risk</i> BNPP B.V. has significant liquidity risk exposure. To mitigate this exposure, BNPP B.V. entered into netting agreements with its parent company and other BNPP Group entities.
D.3	Key risks regarding the Securities	In addition to the risks (including the risk of default) that may affect the Issuer's ability to fulfil its obligations under the Securities [or the Guarantor's ability to perform its obligations under the Guarantee], there are certain factors which are material for the purposes of assessing the risks associated with Securities issued under the Base Prospectus, including: <i>Market Risks</i> -the Securities are unsecured obligations; -the trading price of the Securities is affected by a number of factors including, but not limited to, (in respect of Securities linked to an Underlying Reference) the price of the relevant Underlying Reference(s), time to redemption and volatility and such factors mean that the trading price of the Securities may be below the Cash Settlement Amount or value of the Entitlement; -exposure to the Underlying Reference in many cases will be achieved by the relevant Issuer entering into hedging arrangements and, in respect of Securities linked to an Underlying Reference, potential investors are exposed to the performance of these hedging arrangements and events that may affect the hedging arrangements and consequently the occurrence of any of these events may affect the value of the Securities;

Element	Title	
		<i>Holder Risks</i> -the meetings of Holders provisions permit defined majorities to bind all Holders; -in certain circumstances Holders may lose the entire value of their investment; <i>Issuer/Guarantor Risks</i> -a reduction in the rating, if any, accorded to outstanding debt securities of the Issuer or Guarantor (if applicable) by a credit rating agency could result in a reduction in the trading value of the Securities; -certain conflicts of interest may arise (see Element E.4 below); <i>Legal Risks</i> -the occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Securities, early redemption or may result in the amount payable on scheduled redemption being different from the amount expected to be paid at scheduled redemption and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Securities; -expenses and taxation may be payable in respect of the Securities; -the Securities may be redeemed in the case of illegality or impracticability and such redemption may result in an investor not realising a return on an investment in the Securities; -any judicial decision or change to an administrative practice or change to English law or French law, as applicable, after the date of the Base Prospectus could materially adversely impact the value of any Securities affected by it; <i>Secondary Market Risks</i> -the only means through which a Holder can realise value from the Security prior to its Redemption Date is to sell it at its then market price in an available secondary market and that there may be no secondary market for the Securities (which could mean that an investor has to exercise or wait until redemption of the Securities to realise a greater value than its trading value); <i>Risks relating to Underlying Reference Asset(s)</i> -In addition, there are specific risks in relation to Securities which are linked to an Underlying Reference (including Hybrid Securities) and an investment in such Securities will entail significant risks not associated with an investment in a conventional debt security. Risk factors in relation to Underlying Reference linked Securities include: -exposure to one or more share, similar market risks to a direct equity investment, global depositary receipt ("GDR") or American depositary receipt ("ADR"), potential adjustment events or extraordinary events affecting shares and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Securities and that the Issuer will not provide post-issuance information in relation to the Underlying Reference. <i>Risks relating to specific types of products</i> The following risks are associated with SPS Products

Element	Title	
		Indexation Products Investors may be exposed to a partial or total loss of their investment. The return on the Securities depends on the performance of the Underlying Reference(s) and the application of knock-in features.
D.6	Risk warning	See Element D.3 above. In the event of the insolvency of the Issuer or if it is otherwise unable or unwilling to repay the Securities when repayment falls due, an investor may lose all or part of his investment in the Securities. If the Guarantor is unable or unwilling to meet its obligations under the Guarantee when due, an investor may lose all or part of his investment in the Securities. In addition, investors may lose all or part of their investment in the Securities as a result of the terms and conditions of the Securities.

Section E - Offer

Element	Title	
E.2b	Reasons for the offer and use of proceeds	The net proceeds from the issue of the Securities will become part of the general funds of the Issuer. Such proceeds may be used to maintain positions in options or futures contracts or other hedging instruments.
E.3	Terms and conditions of the offer	This issue of Securities is being offered in a Non-exempt Offer in Finland. The issue price of the Securities is 100% of their nominal amount.
E.4	Interest of natural and legal persons involved in the issue/offer	Other than as mentioned above, so far as the Issuer is aware, no person involved in the issue of the Securities has an interest material to the offer, including conflicting interests.
E.7	Expenses charged to the investor by the Issuer	No expenses are being charged to an investor by the Issuer.

EMISSIONSSPECIFIK PROGRAMSAMMANFATTNING HÄNFÖRLIG TILL DETTA GRUNDPROSPEKT

Sammanfattningen ställs upp efter informationskrav i form av ett antal "Punkter". Dessa Punkter är numrerade i Avsnitten A - E (A.1 - E.7). Denna sammanfattning innehåller alla de Punkter som ska inkluderas i en sammanfattning för aktuell typ av Värdepapper, Emittent och Garant. Eftersom vissa Punkter inte behöver adresseras kan det finnas luckor i Punkternas numrering. Även om det krävs att en Punkt inkluderas i sammanfattningen för aktuell typ av Värdepapper, Emittent och Garant, är det möjligt att ingen relevant information kan ges rörande Punkten. I detta fall ska en kort beskrivning av Punkten samt en förklaring till varför Punkten inte är tillämplig inkluderas i sammanfattningen.

Section A - Introduktion och varningar

Punkt	Rubrik	
		Under 2017 ökade den globala tillväxten med cirka 3,5 procent, vilket återspeglar en förbättring i alla geografiska regioner. I de stora, utvecklade länderna leder denna ökade aktivitet till en åtstramning, eller en minskning, av anpassningen av penningpolitiken. Men med inflationsnivåer som fortfarande är mycket måttliga, kan centralbankerna hantera denna övergång mycket gradvis, utan att kompromissa med de ekonomiska utsikterna. IMF förväntar sig en världsomfattande tillväxt som stärks ännu mer under 2018 och har reviderat sin prognos från +3,6 procent till +3,7 procent: den måttliga avmattningen som förväntas i de utvecklade ekonomierna bör mer än jämnas ut av den prognostiserade förbättringen i tillväxtländerna (påskyndad av återhämtningen i Latinamerika och Mellanöstern, och trots den strukturella lägre ekonomiska tillväxttakten i Kina). Mot denna bakgrund kan följande två riskkategorier identifieras: Risker för finansiell instabilitet på grund av genomförandet av penningpolitiken Två risker ska betonas: en skarpa räntehöjningar och den aktuella, mycket anpassade penningpolitiken som behållits för länge. Å ena sidan medför den fortsatta åtstramningen av penningpolitiken i USA (som inleddes 2015) och den mindre anpassade penningpolitiken i euroområdet (en planerad minskning av förvärven av tillgångar som började i januari 2018) risker för finansiell turbulens. Risken för en otillräckligt kontrollerad ökning av de långa räntorna kan särskilt betonas, i ett scenario med en oväntat ökad inflation eller en oväntad åtstramning av penningpolitiken. Om denna risk blir verklighet, kan det få negativa konsekvenser för tillgångsmarknaderna, särskilt de där riskpremierna är extremt låga jämfört med deras historiska genomsnitt, efter ett decennium med anpassad penningpolitik (krediter till företag eller länder med sämre kreditvärdering, vissa sektorer på aktiemarknaderna, fastigheter etc.). Å andra sidan, trots uppgången sedan mitten av 2016 fortsätter räntorna att vara låga, vilket kan uppmuntra överdrivet risktagande bland vissa finansmarknadsaktörer: längre löptider för finansiering och innehavda tillgångar, mindre stringent kreditpolicy och ökad lånefinansiering. Vissa av dessa aktörer (försäkringsbolag, pensionsfonder, förmögenhetsförvaltare etc.) har en ökad systemisk dimension och i händelse av marknadsturbulens (till exempel knuten till skarpt ökade räntor och/eller en skarp kurskorrigering) kan de tvingas sälja stora innehav vid en förhållandevis svag marknadslikviditet. Systemiska risker hänförliga till ökad skuldsättning Makroekonomiskt kan inverkan av en räntehöjning vara betydande för länder med hög offentlig och/eller privat skuld i förhållande till BNP. Detta är särskilt fallet för USA och vissa europeiska länder (särskilt Grekland, Italien och Portugal), som uppvisar offentliga skuldnivåer i förhållande till BNP som ofta ligger över 100 procent men det gäller även för tillväxtmarknadsländer. Mellan 2008 och 2017 redovisade de senare en marknadsökning avseende sina statspapper, däribland statspapper i utländsk valuta som lån av utländska fordringsägare. Den privata sektorn var huvudkällan till ökningen av statspapperen, men det gäller även den offentliga sektorn i mindre utsträckning, särskilt i Afrika. Dessa länder är särskilt sårbara för en stramare penningpolitik i de utvecklade ekonomierna. Utfödet av kapital kan tynga växelkurserna, de ökade kostnaderna för hantera de statspapperen, importera inflationen, och föranleda tillväxtmarknadsländernas centralbanker att strama åt sina kreditvillkor. Detta skulle skapa försämrade prognoser för den ekonomiska tillväxten, möjliga nedgraderingar av kreditbetygen på statspapper och en ökad risk för bankerna. Samtidigt som BNP Paribas-koncernens exponering mot tillväxtmarknadsländer är begränsad, kan dessa ekonomiers sårbarhet leda till störningar i de globala finansiella systemen vilka kan påverka koncernen och potentiellt förändra koncernens resultat. Lägg märke till att skuldbaserad risk kan bli en verklighet, inte bara i händelse av en

		skarp höjning av räntan, utan även med eventuella negativa tillväxtchocker. Lagar och bestämmelser tillämpliga för finansinstitut Nyligen inträffade och framtida förändringar av lagar och andra förordningar som tillämpas för finansinstitut kan på en betydande inverkan på BNPP. Åtgärder som nyligen antogs eller vilka (eller vilkas tillämpningsåtgärder) fortfarande är i utkastformat, som har eller sannolikt får en inverkan på BNPP omfattar särskilt: • de strukturella reformer som omfattar den franska banklagen av den 26 juli 2013 som kräver att banker skapar dotterbolag för eller segregerar "spekulativa" egna transaktioner från sin traditionella bankverksamhet, "Volckerregeln" i USA som begränsar egna transaktioner, sponsorskap och investeringar i privata aktiefonder och hedgefonder av USA och utländska banker, och kommande potentiella förändringar i Europa; • förordningar som styr kapital: kapitalkravsdirektiv IV ("CRD 4")/kapitalkravsförordningen ("CRR"), den internationella standarden för total förlustreduceringskapacitet ("TLAC") och BNPP:s utnämning som finansinstitut som är systemsikt viktig av rådet för finansiell stabilitet (FSB), • mekanismen för den europeiska tillsynsnämnden och förordningen av den 6 november 2014; • direktivet av den 16 april 2014 som rör insättningsgarantisystem och dess delegations- och genomförandedekret, direktivet av den 15 maj 2014 som etablerar en ram för återhämtning och rekonstruktion av banker, en gemensam rekonstruktionsmekanism som etablerar gemensamt rådsresolution och en gemensam resolutionsfond; • den definitiva bestämmelsen av USA:s centralbank som inför stramare tillsynsregler för amerikanska transaktioner av stora utländska banker, särskilt skyldigheten att skapa ett separat förmedlande holdingbolag i USA (kapitaliserat och föremål för reglering) för att hantera sina amerikanska dotterbolag; • de nya bestämmelserna för reglering av OTC-derivat enligt avdelning VII i Dodd-Frank-lagen "Wall Street Reform and Consumer Protection Act", särskilt marginalkraven för icke avräknade derivatprodukter och derivat på värdepapper som omsätts av swaphandlare, större swapdeltagare, värdepappersbaserade swaphandlare och större värdepappersbaserade swapdeltagare, och reglerna för den amerikanska värdepappers- och fondbörskommissionen som kräver registrering av banker och större swapdeltagare som är aktiva på derivatmarknader samt transparens och redovisning om derivattransaktioner, • det nya direktivet om marknader för finansiella instrument ("MiFID") och förordningen om marknader för finansiella instrument ("MiFIR"), och europeiska förordningar som styr avräkningen av vissa OTC-derivatprodukter av centraliserade motparter och yppandet av transaktioner för värdepappersfinansiering till centraliserade organ. • Den allmänna dataskyddsförordningen ("GDPR") som trade i kraft den 25 maj 2018 och den ökar den europeiska dataskyddsmiljön och förbättrar personuppgiftsskyddet inom EU. Företag löper risken att drabbas av höga böter om de inte följer normerna i GDPR. Denna förordning gäller alla banker som tillhandahåller tjänster till europeiska medborgare och • fullbordandet av Basel 3 som publicerats av Baselkommittén i december 2017, som inför en revision av hur man mäter kreditrisk, operativ risk, risken vid justering av kreditvärdering ("CVA") vid beräkning av riskviktade tillgångar. Dessa åtgärder förväntas träda i kraft i januari 2022 och kommer att bli föremål för en nedre utdatanivå (baserat på standardiserade metoder),

		som gradvis kommer att tillämpas från 2022 och nå nivån för slutmålet 2027. Med dagens tuffare regelverk är dessutom risken för att inte följa bestämmelserna i befintliga lagar och förordningar, särskilt sådana som rör skydd av kundernas intressen, betydande för bankbranschen, vilket kan leda till omfattande förluster och böter. Utöver systemet för att följa lagar och regler, vilket särskilt omfattar denna typ av risk, lägger BNP Paribas-koncernen kundernas intressen, och mer brett intressenternas intresse, i centrum av koncernens värden. Den nya uppförandekoden som antogs av BNP Paribas-koncernen 2016 anger detaljerade värden och regler för uppförandet i detta område. Cybersäkerhet och teknikrisk BNPP:s förmåga att göra affärer är nära förbundet med flexibiliteten i elektroniska transaktioner samt skydd och säkerhet för information och tekniska tillgångar. Den tekniska förändringen ökar takten i och med den digitala omvandlingen och den ökning som är resultatet av antalet kommunikationskedjor, spridningen av datakällor, ökad processautomatisering och större användning av elektroniska banktransaktioner. Framstegen och den allt snabbare tekniska förändringen ger cyberkriminella nya möjligheter att ändra, stjäla och yppa data. Antalet attacker ökar och har en större räckvidd och är mer avancerade inom alla sektorer, däribland finansiella tjänster. Utkontrakteringen av ett ökat antal processer exponerar även BNP Paribas Group för strukturella cybersäkerhets- och teknikrisker som leder till att det kan uppstå möjliga attacker som cyberkriminella kan utnyttja. I enlighet med detta har BNP Paribas Group installerat en andra försvarslinje inom ramen för riskfunktionen i och med skapandet av Risk ORC ICT-teamet vars uppgift är att hantera cybersäkerheten och teknikrisken. Följaktligen anpassas standarderna regelbundet för att stödja BNPP:s digitala utveckling och innovation samtidigt med en hantering av befintliga och tillkommande hot (som till exempel cyberbrottslighet, spionage etc.).															
B.19/B.5	Beskrivning av Koncernen	BNPP är en av de ledande europeiska tillhandahållarna av tjänster inom området bank och finans och har fyra inhemska retail banking-marknader i Europa, nämligen Frankrike, Belgien, Italien och Luxemburg. 		avtalet med IBM France för en period fram till slutet av 2017 och har följaktligen förnyat avtalet för en period som löper ut i slutet av 2021. I slutet av 2012 ingick parterna ett avtal om att gradvis utöka detta upplägg till BNP Paribas Fortis från och med 2013. Det schweiziska dotterbolaget avvecklades den 31 december 2016. BP²l:s är under IBM France operativa ledning. BNP Paribas har ett starkt inflytande över bolaget som till hälften ägs av IBM France. De av BNP Paribas anställda som gjorts tillgängliga för BP²l utgör hälften av det bolagets permanenta personal, som tillsammans med dess lokaler och datacentraler tillhör koncernen och den nuvarande ledningen ger BNP Paribas avtalsenlig rätt att kontrollera bolaget och återföra det in i koncernen om nödvändigt. IBM Luxembourg ansvarar för infrastrukturtjänster och dataproduktion för vissa av BNP Paribas Luxemburgs enheter. BancWest's databehandlingstjänster är utlokaliserade till Fidelity Information Services. Cofinoga Frances databehandlingstjänster är utlokaliserade till SDDC som är ett helägt dotterbolag till IBM. Se även Punkt B.5 ovan.
B.19/ B.15	Huvudsaklig verksamhet	BNP Paribas har nyckelpositioner inom sina två verksamhetsområden: - Retail Banking and Services, vilket inkluderar: - nationella marknader, vilka inbegriper: - Fransk Retail Banking (FRB), - BNL banca commerciale (BNL bc), italiensk retail banking, - Belgisk Retail Banking (BRB), - Andra Domestika Marknadsaktiviteter, inklusive luxemburgsk Retail Banking (LRB); - internationella finansiella tjänster, vilka inbegriper: - Europa-Medelhavsområdet, - BancWest, - Privatekonomi, - Försäkring, - Förmögenhetsförvaltning och förvaltning av tillgångar. - Corporate and Institutional Banking (CIB), vilket inbegriper: - Affärsbanksverksamhet, - Globala marknader, - Värdepapperstjänster.

Section D - Risker

Punkt	Rubrik	
D.2	Huvud-sakliga riskfaktorer beträffande Emittenten och Garanten	Prospective purchasers of the Securities should be experienced with respect to options and options transactions and should understand the risks of transactions involving the Securities. An investment in the Securities presents certain risks that should be taken into account before any investment decision is made. Certain risks may affect the Issuer's ability to fulfil its obligations under the Securities or the Guarantor's ability to perform its obligations under the Guarantee, some of which are beyond its control. In particular, the Issuer and the Guarantor, together with the BNPP Group, are exposed to the risks associated with its activities, as described below: Guarantor As defined in BNPP's 2017 Registration Document (in English) and Annual Financial Report, eight main categories of risk are inherent in BNPP's activities: (1) <i>Credit Risk</i> - Credit risk is the consequence resulting from the likelihood that a borrower or counterparty will fail to meet its obligations in accordance with agreed terms. The probability of default and the expected recovery on the loan or receivable in the event of default are key components of the credit quality assessment; (2) <i>Securitisation in the banking book</i> - Securitisation means a transaction or scheme, whereby the credit risk associated with an exposure or pool of exposures is tranching, having the following characteristics: - payments made in the transaction or scheme are dependent upon the performance of the exposure or pool of exposures; - the subordination of tranches determines the distribution of losses during the life of the risk transfer. Any commitment (including derivatives and liquidity lines) granted to a securitisation operation must be treated as a securitisation exposure. Most of these commitments are held in the prudential banking book; (3) <i>Counterparty Credit Risk</i> - Counterparty credit risk is the translation of the credit risk embedded in financial transactions, investments and/or settlement transactions between counterparties. Those transactions include bilateral contracts such as over-the-counter ("OTC") derivatives contracts as well as contracts settled through clearing houses. The amount of this risk may vary over time in line with changing market parameters which then impacts the replacement value of the relevant transactions Counterparty risk lies in the event that a counterparty defaults on its obligations to pay BNPP the full present value of the flows relating to a transaction or a portfolio for which BNPP is a net receiver. Counterparty credit risk is also linked to the replacement cost of a derivative or portfolio in the event of counterparty default. Hence, it can be seen as a market risk in case of default or a contingent risk. (4) <i>Market Risk</i> - Market risk is the risk of incurring a loss of value due to adverse trends in market prices or parameters, whether directly observable or not. Observable market parameters include, but are not limited to, exchange rates, prices of securities and commodities (whether listed or obtained by reference to a similar asset), prices of derivatives, and other parameters that can be directly inferred from them, such as interest rates, credit spreads, volatilities and implied correlations or other similar parameters. Non-observable factors are those based on working assumptions such as

Punkt	Rubrik	
		parameters contained in models or based on statistical or economic analyses, non-ascertainable in the market. In fixed income trading books, credit instruments are valued on the basis of bond yields and credit spreads, which represent market parameters in the same way as interest rates or foreign exchange rates. The credit risk arising on the issuer of the debt instrument is therefore a component of market risk known as issuer risk. Liquidity is an important component of market risk. In times of limited or no liquidity, instruments or goods may not be tradable or may not be tradable at their estimated value. This may arise, for example, due to low transaction volumes, legal restrictions or a strong imbalance between demand and supply for certain assets. The market risk related to banking activities encompasses the interest rate and foreign exchange risks stemming from banking intermediation activities; (5) <i>Liquidity Risk</i> - Liquidity risk is the risk that BNPP will not be able to honour its commitments or unwind or settle a position due to the market environment or idiosyncratic factors (i.e. specific to BNP Paribas), within a given timeframe and at a reasonable cost. Liquidity risk reflects the risk of the BNPP Group being unable to fulfil current or future foreseen or unforeseen cash or collateral requirements, across all time horizons, from the short to the long term This risk may stem from the reduction in funding sources, draw down of funding commitments, a reduction in the liquidity of certain assets, or an increase in cash or collateral margin calls. It may be related to the bank itself (reputation risk) or to external factors (risks in some markets). The BNPP Group's liquidity risk is managed under a global liquidity policy approved by the Group's ALM Committee. This policy is based on management principles designed to apply both in normal conditions and in a liquidity crisis. The Group's liquidity position is assessed on the basis of internal indicators and regulatory ratios. (6) <i>Operational Risk</i> - Operational risk is the risk of incurring a loss due to inadequate or failed internal processes, or due to external events, whether deliberate, accidental or natural occurrences. Management of operational risk is based on an analysis of the "cause - event - effect" chain. Internal processes giving rise to operational risk may involve employees and/or IT systems. External events include, but are not limited to floods, fire, earthquakes and terrorist attacks. Credit or market events such as default or fluctuations in value do not fall within the scope of operational risk. Operational risk encompasses fraud, human resources risks, legal risks, non-compliance risks, tax risks, information system risks, conduct risks (risks related to the provision of inappropriate financial services), risk related to failures in operating processes, including loan procedures or model risks, as well as any potential financial implications resulting from the management of reputation risks; (7) <i>Compliance and Reputation Risk</i> - Compliance risk is defined in French regulations as the risk of legal, administrative or disciplinary sanctions, of significant financial loss or reputational damage that a bank may suffer as a result of failure to comply with national or European laws and regulations,

Punkt	Rubrik	
		codes of conduct and standards of good practice applicable to banking and financial activities, or instructions given by an executive body, particularly in application of guidelines issued by a supervisory body. By definition, this risk is a sub-category of operational risk. However, as certain implications of compliance risk involve more than a purely financial loss and may actually damage the institution's reputation, BNPP treats compliance risk separately. Reputation risk is the risk of damaging the trust placed in a corporation by its customers, counterparties, suppliers, employees, shareholders, supervisors and any other stakeholder whose trust is an essential condition for the corporation to carry out its day-to-day operations. Reputation risk is primarily contingent on all the other risks borne by BNPP, specifically the potential materialisation of a credit or market risk, or an operational risk, as well as a violation of the Group's code of conduct; (8) <i>Insurance Risks</i> - BNP Paribas Cardif is exposed to the following risks: - underwriting risk: underwriting risk is the risk of a financial loss caused by a sudden, unexpected increase in insurance claims. Depending on the type of insurance business (life, non-life), this risk may be statistical, macroeconomic or behavioural, or may be related to public health issues or disasters; - market risk: market risk is the risk of a financial loss arising from adverse movements of financial markets. These adverse movements are notably reflected in price fluctuations (foreign exchange rates, bonds, equities and commodities, derivatives, real estate, etc.) and derived from fluctuations in interest rates, credit spreads, volatilities and correlations; - credit risk: credit risk is the risk of loss or adverse change in the financial situation resulting from fluctuations in the credit standing of issuers of securities, counterparties and any debtors to which the BNP Paribas Cardif group is exposed. Among the debtors, risks related to financial instruments (including the banks in which the BNP Paribas Cardif group holds deposits) and risks related to receivables generated by the underwriting activities (premium collection, reinsurance recovering, etc.) are divided into two categories: assets credit risk and liabilities credit risk; - liquidity risk: liquidity risk is the risk of being unable to fulfil current or future foreseen or unforeseen cash requirements coming from insurance commitments to policyholders, because of an inability to sell assets in a timely manner; and - operational risk: operational risk is the risk of loss resulting from the inadequacy or failure of internal processes, IT failures or external events, whether accidental or natural. These external events mentioned in this definition include those of human or natural origin. <i>Risks</i> This section summarises the principal risks that BNPP currently considers itself to face. They are presented in the following categories: risks related to the macroeconomic and market environment, regulatory risks and risks related to BNPP, its strategy, management and operations. (a) Difficult market and economic conditions have in the past had and may in

Punkt	Rubrik	
		the future have a material adverse effect on the operating environment for financial institutions and hence on BNPP's financial condition, results of operations and cost of risk. (b) The United Kingdom's referendum to leave the European Union may lead to significant uncertainty, volatility and disruption in European and broader financial and economic markets and hence may adversely affect BNPP's operating environment. (c) Due to the geographic scope of its activities, BNPP may be vulnerable to country or regional-specific political, macroeconomic and financial environments or circumstances. (d) BNPP's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in credit spreads or other factors. (e) Downgrades in the credit ratings of France or of BNPP may increase BNPP's borrowing cost. (f) Significant interest rate changes could adversely affect BNPP's revenues or profitability. (g) The prolonged low interest rate environment carries inherent systemic risks, and an exit from such environment also carries risks. (h) The soundness and conduct of other financial institutions and market participants could adversely affect BNPP. (i) BNPP may incur significant losses on its trading and investment activities due to market fluctuations and volatility. (j) BNPP may generate lower revenues from brokerage and other commission and fee-based businesses during market downturns. (k) Protracted market declines can reduce liquidity in the markets, making it harder to sell assets and possibly leading to material losses. (l) Laws and regulations adopted in recent years, particularly in response to the global financial crisis, as well as new legislative proposals, may materially impact BNPP and the financial and economic environment in which it operates. (m) BNPP is subject to extensive and evolving regulatory regimes in the jurisdictions in which it operates. (n) BNPP may incur substantial fines and other administrative and criminal penalties for non-compliance with applicable laws and regulations, and may also incur losses in related (or unrelated) litigation with private parties. (o) There are risks related to the implementation of BNPP's strategic plans and

Punkt	Rubrik	
		commitment to environmental responsibility. (p) BNPP may experience difficulties integrating acquired companies and may be unable to realise the benefits expected from its acquisitions. (q) Intense competition by banking and non-banking operators could adversely affect BNPP's revenues and profitability. (r) A substantial increase in new provisions or a shortfall in the level of previously recorded provisions could adversely affect BNPP's results of operations and financial condition. (s) BNPP's risk management policies, procedures and methods, may leave it exposed to unidentified or unanticipated risks, which could lead to material losses. (t) BNPP's hedging strategies may not prevent losses. (u) Adjustments to the carrying value of BNPP's securities and derivatives portfolios and BNPP's own debt could have an impact on its net income and shareholders' equity. (v) The expected changes in accounting principles relating to financial instruments may have an impact on BNPP's balance sheet, income statement and regulatory capital ratios and result in additional costs. (w) BNPP's competitive position could be harmed if its reputation is damaged. (x) An interruption in or a breach of BNPP's information systems may result in material losses of client or customer information, damage to BNPP's reputation and lead to financial losses. (y) Unforeseen external events may disrupt BNPP's operations and cause substantial losses and additional costs. Issuer The main risks described above in relation to BNPP also represent the main risks for BNPP B.V., either as an individual entity or a company in the BNPP Group. Dependency Risk BNPP B.V. is an operating company. The assets of BNPP B.V. consist of the obligations of other BNPP Group entities. The ability of BNPP B.V. to meet its own obligations will depend on the ability of other BNPP Group entities to fulfil their obligations. In respect of securities it issues, the ability of BNPP B.V. to meet its obligations under such securities depends on the receipt by it of payments under certain hedging agreements that it enters with other BNPP Group entities. Consequently, Holders of BNPP B.V. securities will, subject to the provisions of the Guarantee issued by BNPP, be exposed to the ability of BNPP Group entities to perform their obligations under such hedging agreements. Market Risk

Punkt	Rubrik	
		BNPP B.V. takes on exposure to market risks arising from positions in interest rates, currency exchange rates, commodities and equity products, all of which are exposed to general and specific market movements. However, these risks are hedged by option and swap agreements and therefore these risks are mitigated in principle. <i>Credit Risk</i> BNPP B.V. has significant concentration of credit risks as all OTC contracts are acquired from its parent company and other BNPP Group entities. Taking into consideration the objective and activities of BNPP B.V. and the fact that its parent company is under supervision of the European Central Bank and the Autorité de Contrôle Prudentiel et de Résolution management considers these risks as acceptable. The long term senior debt of BNP Paribas is rated (A) by Standard & Poor's and (Aa3) by Moody's. <i>Liquidity Risk</i> BNPP B.V. has significant liquidity risk exposure. To mitigate this exposure, BNPP B.V. entered into netting agreements with its parent company and other BNPP Group entities.
D.3	Huvud-sakliga risker avseende Värdepapper	Utöver de risker (inklusive risken för obestånd) som kan påverka Emittentens förmåga att uppfylla sina åtaganden för värdepapperen eller borgensmannens förmåga att uppfylla sina åtaganden enligt borgensförbindelsen, finns det vissa faktorer som är väsentliga vid en bedömning av de risker som är förknippade med värdepapper som emitterats i enlighet med detta grundprospekt, däribland: <i>Marknadsrisker</i> - värdepapperen (andra än de säkerställda värdepapperen) är icke säkerställda obligationer; - värdepapper med hävstång har en högre risknivå och närhelst det föreligger förluster på sådana värdepapper kan de förlusterna bli högre än förluster på ett liknande värdepapper som inte har hävstång; - exponering mot den underliggande referensen kommer i många fall att uppnås genom att ingå säkringsavtal och, när det gäller värdepapper knutna till en underliggande referens, exponeras potentiella investerare mot avkastningen på dessa säkringsavtal och händelser som kan påverka säkringsavtalen och följaktligen att någon av dessa händelser inträffar, vilket kan påverka värdet på värdepapperen, - exponering mot Underliggande Referens kan i många fall åstadkommas genom att aktuell Emittent ingår ett hedgingupplägg och, i förhållande till Värdepapper kopplade till en Underliggande Referens är potentiella investerare exponerade mot resultatet av dessa hedgingupplägg samt händelser som kan komma att påverka hedgingupplägg och sålunda kan uppkomsten av sådana händelser påverka Värdepapprenas värde, <i>Innehavarrisker</i> - möten som rör bestämmelser för innehavare kan tillåta fastställda majoriteter att fatta bindande beslut för alla innehavare, - under särskilda omständigheter kan innehavarna förlora hela värdet på sina investeringar, <i>Risk med Emittent och borgensman</i> - en sänkt värdering som i förekommande fall medges utestående skuldebrev från Emittenten eller borgensmannen (om det är tillämpligt) av ett kreditvärderingsinstitut kan leda till ett minskat handelsvärde på värdepapperen,

Punkt	Rubrik	
		- vissa intressekonflikter kan uppstå (se punkt E.4 nedan). <i>Rättsliga risker</i> - förekomsten av ytterligare en störningshändelse eller potentiella ytterligare störningshändelser kan komma att leda till en justering av värdepapperen, tidig inlösen eller kan leda till att det belopp som ska betalas vid planerad inlösen är annorlunda än det belopp som förväntas betalas vid planerad inlösen och följaktligen kan uppkomsten av ytterligare en störningshändelse och/eller potentiella ytterligare störningshändelse få en negativ inverkan på värdepapperens värde eller likviditet, - kostnader och beskattning kan betalas för värdepapperen, - värdepapperen kan lösas in i händelse av olaglighet eller ogenomförbarhet och en sådan inlösen kan leda till att en investerare inte kan göra någon vinst på en investering i värdepapperen, - ett rättsbeslut eller en ändring av administrativ praxis eller en ändring av engelsk eller fransk lag, efter omständigheterna, efter datumet för grundprospektet kan påverka värdet på berörda värdepapper negativt, - Vid början av erbjudandeperioden kommer den gearing räntesatsen, FR-räntesatsen, och AER-exitkursen vara okända men de Slutliga Villkoren kommer specificera ett indikativt intervall. Potentiella investerare är tvungna att grunda sitt beslut att köpa Värdepapper med beaktande av detta indikativa intervall innan de notifieras om den faktiska gearing räntesatsen, FR-räntesatsen, och AER-exitkursen som kommer att gälla för Värdepapperna. Notifiering om den faktiska satsen, nivån eller procenten, såsom tillämpligt, kommer att publiceras på samma sätt som de Slutliga Villkoren publiceras. <i>Sekundära marknadsrisker</i> - det enda sättet på vilket en innehavare kan realisera värde från värdepapperet före inlösendatumet är att sälja det till den då gällande marknadskursen på en tillgänglig sekundärmarknad och att det då kanske inte finns någon sekundärmarknad för värdepapperen (vilket kan innebära att en investerare måste lösa in eller vänta till inlösen av värdepapperen för att realisera ett större värde än handelsvärdet) - BNP Paribas Arbitrage S.N.C. skyldigt att agera som marketmaker. Under vissa omständigheter kommer BNP Paribas Arbitrage S.N.C. att sträva efter att upprätthålla en andrahandsmarknad under Värdepapprens hela löptid enligt de normala marknadsvillkor och kommer att lämna anbud och offertpriser. Marginalen mellan anbud och offertpriser kan förändras under Värdepapprens löptid. Under vissa perioder kan det emellertid vara svårt, opraktiskt eller omöjligt för BNP Paribas Arbitrage S.N.C. att lämna anbud eller offertpriser och under dessa perioder kan det också vara svårt, opraktiskt eller omöjligt att köpa eller sälja dessa Värdepapper. Det kan exempelvis bero på ogynnsamma marknadsvillkor, instabila priser eller stora kurssvängningar, att en stor marknad stängs eller begränsas eller vid tekniska problem som avbrott eller störningar i IT-system eller nätverk. <i>Risker som rör underliggande referens(er)</i> Det finns även specifika risker förknippade med Värdepapper kopplade till en Underliggande Referens (inkluderande Hybridvärdepapper) och en investering i sådana Värdepapper medför väsentliga risker som inte är förknippade med en investering i konventionella skuldsedlar. Riskfaktorer i förhållande till Värdepapper kopplade till en Underliggande Referens inkluderar: exponering mot ett eller flera index, justeringshändelser och marknadsstörningar eller misslyckande till öppet utbyte, som kan komma att ha en negativ inverkan på Värdepapprens värde och likviditet, och att Emittenten inte kommer att lämna information efter emissionen avseende den Underliggande Referensen.

Punkt	Rubrik	
		<i>Risker som rör specifika produkttyper</i> Följande risker är förbundna med SPS-produkter Indexeringsprodukter Investerarare kan exponeras mot en partiell eller fullständig förlust av sin investering. Avkastningen på värdepapper beror på avkastningen på den eller de underliggande referenserna och på egenskaper som knock-in, knock-out och/eller automatisk tidig inlösen tillämpas. Beroende på tillämpningsformeln kan investerarna, om en automatisk tidig inlösenhändelse inträffar, exponeras mot en partiell förlust av sin investering.
D.6	Risk-varning	Se Punkt D.3 ovan. För det fall Emittenten blir insolvent eller i övrigt inte kan eller vill återbetala Värdepapprena när dessa förfaller till betalning, kan en investerare komma att förlora hela eller delar av investeringen i Värdepapprena. Om Garanten inte kan eller vill infria sina åtaganden enligt Garantiåtagandet när dessa ska infrias, kan en investerare komma att förlora hela eller delar av investeringen i Värdepapprena. Investerarare kan även komma att förlora hela eller delar av investeringen i Värdepapprena till följd av villkoren för dessa Värdepapper.

Section E - Erbjudande

Punkt	Rubrik	
E.2b	Bakgrund till erbjudandet och användning av intäkter	Nettointäkterna från emissionen av Värdepapprena kommer att bli en del av Emittentens huvudsakliga medel. Sådana intäkter kan komma att användas för att bibehålla positioner inom optioner och terminskontrakt eller andra hedginginstrument.
E.3	Villkor för erbjudandet	Detta utgivande av Värdepapper erbjuds i ett Erbjudande till Allmänheten i kungadömet Sverige. Teckningskursen för Värdepappren är 100 procent.
E.4	Intressen och intressekonflikter	Utöver vad som angivits ovan, har såvitt Emittenten känner till ingen person som varit involverad i utgivandet av Värdepapprena något väsentligt intresse i förhållande till erbjudandet, inklusive intressekonflikter.
E.7	Kostnader för investeraren	Inga kostnader debiteras en investerare av Emittenten.
