B.3

What are the key risks that are specific to the Issuer?

Risk Relating to the Issuer and Guarantor

Holders of Securities issued by the Issuer bear the credit risk of the relevant Issuer and/or the Guarantor, that is the risk that the relevant Issuer and/or the Guarantor is not able to meet its obligations under such Securities, irrespective of whether such Securities are referred to as capital or principal protected or how any principal, interest or other payments under Securities are to be calculated. If the Issuer and/or the Guarantor is not able to meet its obligations under the Securities, then that would have a significant negative impact on the investor's return on the Securities and an investor may lose up to its entire investment.

All material assets of MSBV are obligations of (or securities issued by) one or more Morgan Stanley Group companies. If any of these Morgan Stanley Group companies incurs losses with respect to any of its activities (irrespective of whether those activities relate to MSBV or not) the ability of such company to fulfil its obligations to MSBV could be impaired, thereby exposing holders of securities issued by MSBV to a risk of loss.

The following key risks affect Morgan Stanley and, since Morgan Stanley is the ultimate holding company of MSBV, also impact MSBV:

- **Risks relating to the financial situation of Morgan Stanley**

Morgan Stanley's results of operations may be materially affected by market fluctuations and by global financial market and economic conditions and other factors. Holding large and concentrated positions may expose Morgan Stanley to losses. These factors may result in losses for a position or portfolio owned by Morgan Stanley.

Morgan Stanley is exposed to the risk that third parties that are indebted to it will not perform their obligations, as well as that a default by a large financial institution could adversely affect financial markets. Such factors

give rise to the risk of loss arising when a borrower, counterparty or issuer does not meet its financial obligations to Morgan Stanley.

Liquidity is essential to Morgan Stanley's businesses and Morgan Stanley relies on external sources to finance a significant portion of its operations. Morgan Stanley's borrowing costs and access to the debt capital markets depend on its credit ratings. Morgan Stanley is a holding company, has no operations and depends on dividends, distributions and other payments from its subsidiaries. Further, Morgan Stanley's liquidity and financial condition have in the past been, and in the future could be, adversely affected by U.S. and international markets and economic conditions. As a result of the foregoing, there is a risk that Morgan Stanley will be unable to finance its operations due to a loss of access to the capital markets or difficulty in liquidating its assets.

- **Risks relating to the operation of Morgan Stanley's business activities**

Morgan Stanley is subject to operational risks, including a failure, breach or other disruption of its operations or security systems or those of Morgan Stanley's third parties (or third parties thereof), as well as human error or malfeasance, which could adversely affect its businesses or reputation. A cyber-attack, information or security breach or a technology failure of Morgan Stanley's or of its third parties could adversely affect Morgan Stanley's ability to conduct its business, manage its exposure to risk or result in disclosure or misuse of confidential or proprietary information and otherwise adversely impact its results of operations, liquidity and financial condition, as well as cause reputational harm.

Morgan Stanley's risk management strategies, models and processes may not be fully effective in mitigating its risk exposures in all market environments or against all types of risk. Further, expected replacement of London Interbank Offered Rate and replacement or reform of other interest rate benchmarks could adversely affect Morgan Stanley's business, financial condition and results of operations.

- **Legal, Regulatory and Compliance Risk**

Morgan Stanley is subject to the risk of legal or regulatory sanctions, material financial loss including fines, penalties, judgments, damages and/or settlements, limitations on its business, or loss to reputation it may suffer as a result of its failure to comply with laws, regulations, rules, related self-regulatory organization standards and codes of conduct applicable to its business activities. Morgan Stanley is also subject to contractual and commercial risk, such as the risk that a counterparty's performance obligations will be unenforceable. Additionally, Morgan Stanley is subject to anti-money laundering, anti-corruption and terrorist financing rules and regulations.

- **Other risks relating to Morgan Stanley's business activities**

Morgan Stanley faces strong competition from financial services firms and others, which could lead to pricing pressures that could materially adversely affect its revenue and profitability. Further, automated trading markets may adversely affect Morgan Stanley's business and may increase competition.

Morgan Stanley is subject to numerous political, economic, legal, tax, operational, franchise and other risks as a result of its international operations (including risks of possible nationalization, expropriation, price controls, capital controls, exchange controls, increased taxes and levies, cybersecurity, data transfer and outsourcing restrictions, prohibitions on certain types of foreign and capital market activities, limitations on cross-border listings and other restrictive governmental actions, as well as the outbreak of hostilities or political and governmental instability, including tensions between China and the U.S.) which could adversely impact its businesses in many ways.

Morgan Stanley may be unable to fully capture the expected value from acquisitions, divestitures, joint ventures, partnerships, minority stakes or strategic alliances.

The application of regulatory requirements and strategies in the United States or other jurisdictions to facilitate the orderly resolution of large financial institutions may pose a greater risk of loss for Morgan Stanley's security holders and subject Morgan Stanley to other restrictions.

C.3.4 *Most material risk factors pertaining to the Guarantor*

The most material risk factors pertaining to Morgan Stanley are listed under section B.3 “*What are the key risks that are specific to the Issuer?*” above.

C.4 *What are the key risks that are specific to the Securities?*

Investors may lose all or a substantial portion of their investment if the value/performance of the Relevant Underlying does not move in the anticipated direction.

- The terms of certain Notes differ from those of ordinary debt securities because the Notes may not pay interest and, on maturity, depending on the performance of the Relevant Underlying, may return less than the amount invested or nothing, or may return assets or securities of an issuer that is not affiliated with the Issuer, the value of which is less than the amount invested.
- An investment in the Notes bears the risk that the Issuer is not able to fulfil its obligations in respect of such Notes at maturity or before maturity of the Notes. In certain circumstances, holders may lose all or a substantial portion of their principal or investment. The Issuer has the right to withdraw the offering of the Notes and cancel the issuance of the Notes prior to the end of the subscription period for any reason. Reasons for the cancellation of the offer include, in particular: (i) adverse market conditions, as determined by the Issuer in its reasonable discretion (such as, for example, increased equity market volatility and increased currency exchange rate volatility); or (ii) that the number of applications received at that time is insufficient, in the Issuer’s opinion, to make an economically viable issuance.

<ul style="list-style-type: none"> • It is impossible to predict how the level of the Relevant Underlying will vary over time. The historical performance value (if any) of the Relevant Underlying does not indicate the future performance of the Relevant Underlying. Factors such as volatility, interest rates, remaining term of the Notes or exchange rates will influence the price investors will receive if an investor sells its Notes prior to maturity. • The Determination Agent may determine that a Disruption Event has occurred and such events can affect the Relevant Underlying and lead to adjustments and/or early redemption of the Notes. • The investors will bear the risk of the performance of each of the Basket Components. A high correlation of Basket Components may have a significant effect on amounts payable. The negative performance of a single Basket Component may outweigh a positive performance of one or more other Basket Components. • Amounts payable in respect of the Notes are linked to the value/performance of the worst performing Basket Component, irrespective on the value/performance of the other Basket Components • Payment of redemption and early redemption amounts on the Notes is conditional on the value or performance of the Relevant Underlying being greater than or equal to a specified barrier value, and if such condition (a "barrier condition") is not satisfied. Further, the barrier condition needs to be satisfied by the value/performance of the worst performing Basket Component, irrespective of the performance of the other Basket Components. • The Notes will be redeemed early if the Relevant Underlying Value of the worst performing Basket Component on any Automatic Early Redemption Valuation Date is greater than or equal to a specified barrier value.

B.3

Vilka nyckelrisker är specifika för Emittenten?

Risker relaterade till Emittenten och Garanten

Innehavare av Värdepapper emitterade av Emittenten bär kreditrisken för den relevanta Emittenten och/eller Garanten, som är risken att den relevanta Emittenten och/eller Garanten inte kan uppfylla sina åtaganden enligt Värdepapperen, oavsett huruvida sådana Värdepapper är kapitalskyddade eller principalskyddade eller hur kapitalbelopp, räntebelopp eller andra betalningar enligt sådana Värdepapper ska beräknas. Om Emittenten och/eller Garanten inte kan uppfylla sina åtaganden enligt Värdepapperen, kommer det ha en betydande negativ påverkan på investerarens avkastning på Värdepapperen och en investerare kan förlora hela sin investering.

Samtliga betydande tillgångar för MSBV är åtaganden för (eller värdepapper emitterade av) ett eller flera företag inom Morgan Stanley-Koncernen. Om något av dessa företag inom Morgan Stanley-Koncernen drabbas av förluster avseende någon av dess verksamheter (oavsett om dessa verksamheter är relaterade till MSBV eller inte) kan förmågan hos sådant företag att fullgöra sina åtaganden gentemot MSBV, försämrats och därigenom exponera innehavare av värdepapper emitterade av MSBV mot risk för förlust.

De följande nyckelriskerna påverkar Morgan Stanley, och eftersom Morgan Stanley är det yttersta holdingmoderbolaget för MSBV, påverkar de även MSBV:

Risker relaterade till Morgan Stanleys finansiella ställning

Morgan Stanleys verksamhetsresultat kan väsentligen påverkas av marknadsfluktuationer och av globala finansiella marknader och ekonomiska händelser och andra faktorer. Att inneha stora och koncentrerade positioner exponerar Morgan Stanley för stora förluster. Dessa faktorer kan resultera i förluster för en position eller portfölj som ägs av Morgan Stanley.

Morgan Stanley är exponerat för risken att tredje parter som är skuldsatta till företaget inte kommer uppfylla sina åtaganden, såväl som att ett förfall av en stor finansiell institution negativt kan påverka finansiella marknader. Sådana faktorer ger upphov till risken för förlust som uppstår när en låntagare, motpart eller emittent inte uppfyller sina finansiella åtaganden gentemot Morgan Stanley.

Likviditet är essentiellt för Morgan Stanleys verksamhet och Morgan Stanley förlitar sig på externa källor för att finansiera en betydande del av sin verksamhet. Morgan Stanleys lånekostnader och tillgång till skuldkapitalmarknader är beroende av dess kreditbetyg. Morgan Stanley är ett holdingbolag, har ingen verksamhet och är beroende av dess utdelning, distribution och andra betalningar från dess dotterföretag. Vidare har Morgan Stanleys likviditet och finansiella ställning historiskt varit, och kan i framtiden vara, negativt påverkad av amerikanska och internationella marknader och ekonomiska händelser. Som

en följd av det föregående, finns det en risk att Morgan Stanley kan vara oförmöget att finansiera sin verksamhet på grund av förlorad tillgång till kapitalmarknaderna eller svårigheter att avyttra sina tillgångar.

Risker relaterade till bedrivandet av Morgan Stanleys verksamhet

Morgan Stanley är föremål för operationella risker, inklusive misslyckande, avbrott eller annan störning av dess verksamhet eller säkerhetssystem eller de för Morgan Stanleys tredje parter (eller dess tredje parter), såväl som mänskliga misstag eller felaktigt agerande, vilket negativt kan påverka dess verksamhet eller rykte. En cyberattack, informations- eller säkerhetsavbrott eller teknisk störning hos Morgan Stanley eller någon av dess tredje parter, kan negativt påverka Morgan Stanleys förmåga att utöva sin verksamhet, hantera sin riskexponering eller resultera i avslöjande eller olaglig användning av konfidentiell eller proprietär information och i övrigt negativt påverka dess verksamhetsresultat, likviditet och finansiella ställning, såväl som orsaka en skada på dess rykte.

Morgan Stanleys riskhanteringsstrategier, modeller och processer kanske inte är till fullo effektiva vad avser lindring av dess riskexponering i alla marknadsmiljöer eller mot alla typer av risk. Vidare kan förväntat utbyte av London Interbank Offered Rate och utbyte eller reformering av andra räntereferensvärden negativt påverka Morgan Stanleys verksamhet, finansiella ställning och verksamhetsresultat.

Juridisk, regulatorisk och regelefterlevnadsrisk

Morgan Stanley är föremål för risker avseende juridiska eller regulatoriska sanktioner, betydande finansiella förluster inklusive böter, straff, domar, skadestånd och/eller förlikning, restriktioner för dess verksamhet, eller förlust av rykte som det kan lida som ett resultat av dess oförmåga att efterleva lagar, förordningar och regler, relaterade till självregleringsorganisationers standarder och uppförandekoder tillämpliga på dess verksamhet. Morgan Stanley är även föremål för kontraktuell och kommersiell risk, såsom risken att en motparts prestationsåtaganden inte kommer vara möjliga att verkställa. Vidare är Morgan Stanley föremål för regler och förordningar för att motverka penningtvätt, korruption och terroristfinansiering.

Andra risker relaterade till Morgan Stanleys verksamhet

Morgan Stanley möter stark konkurrens från företag som erbjuder finansiella tjänster och andra, vilket kan leda till prissättningspress som kan påverka dess avkastning och lönsamhet betydande negativt. Vidare kan automatiserade handelsplatser negativt påverka Morgan Stanleys verksamhet och kan öka konkurrensen.

Morgan Stanley är föremål för åtskilliga politiska, legala, skatterättsliga, franchise och andra risker som ett resultat av dess internationella verksamhet (inklusive risker avseende nationalisering, expropriation, priskontroller, kapitalkontroller, börskontroller, ökad beskattning och avgifter, cybersäkerhets-, dataöverförings- och outsourcingrestriktioner, förbud mot vissa typer av utländska och kapitalmarknadsaktiviteter, begränsningar för noteringar utomlands samt andra restriktiva myndighetsåtgärder, såväl som utbrott av fientlighet eller politiskt och myndighetsrelaterad instabilitet, inklusive spänningar mellan Kina och USA), vilka kan negativt påverka dess verksamhet på många sätt.

Morgan Stanley kan vara oförmöget att till fullo fånga det förväntade värdet från avyttringar, joint ventures, partnerskap, minoritetsposter eller strategiska allianser.

Tillämpligheten av regulatoriska krav och strategier i USA eller andra jurisdiktioner för att främja en ordnad upplösning av stora finansiella institutioner kan utgöra en större risk för förlust för Morgan Stanleys Värdepappersinnehavare och för Morgan Stanley för andra restriktioner.

C.3.4 De mest väsentliga riskfaktorerna som hänför sig till Garanten

De mest väsentliga riskfaktorerna som hänför sig till Morgan Stanley finns angivna i avsnitt B.3 "Vilka nyckelrisker är specifika för Emittenten?" ovan.

C.4 Vilka nyckelrisker är specifika för Värdepapperen?

Investerare kan förlora hela eller en betydande del av sin investering om värdet/utvecklingen för den Relevanta Underliggande Tillgången inte rör sig i den förväntade riktningen.

Villkoren för vissa Obligationer kan skilja sig från de för vanliga skuldinstrument eftersom Obligationerna kanske inte betalar ränta och, vid förfallodagen, beroende på utvecklingen för den Relevanta Underliggande Tillgången, kan återbetala mindre än det investerade beloppet eller ingenting, eller kan återbetala tillgångar eller värdepapper från en emittent som inte är förknippad med Emittenten, vars värde kan vara mindre än det investerade beloppet.

En investering i Värdepapperen bär risken att Emittenten eller Garanten inte kan uppfylla sina skyldigheter avseende sådana Obligationer vid förfallodagen eller före Obligationens förfallodag. Under vissa omständigheter kan innehavarna förlora hela eller en betydande del av sitt ursprungliga kapital eller investering. Emittenten har rätt att dra tillbaka erbjudandet av Värdepapperen och avbryta emissionen av Värdepapperen före teckningsperiodens utgång av någon

anledning. Skälen för annullering av erbjudandet inkluderar särskilt: (i) ogynnsamma marknadsförhållanden, som bestämts av Emittenten i sitt rimliga gottfinnande (till exempel ökad volatilitet på aktiemarknaden och ökad valutakursvolatilitet); eller (ii) att antalet ansökningar som mottagits vid den tiden inte är tillräckligt, enligt Emittentens åsikt, för att göra en ekonomiskt genomförbar emission.

Det är omöjligt att förutsäga hur nivån på den Relevanta Underliggande Tillgången kommer att variera över tid. Det historiska utvecklingsvärdet (om det finns någon) för den Relevanta Underliggande Tillgången indikerar inte det framtida resultatet för den Relevanta Underliggande Tillgången. Faktorer som volatilitet, fördelningar på den Relevanta Underliggande Tillgången, räntesatser, återstående löptid för Värdepapperen eller växelkurser kommer att påverka priset som investerarna får om en investerare säljer sina Obligationer före förfallodagen.

Fastställelseagenten kan fastställa att en Störningshändelse har inträffat och sådana händelser kan påverka den Relevanta Underliggande Tillgången och leda till justeringar och/eller förtida inlösen av Obligationerna.

Investerare kommer bära risken för utvecklingen för vardera av Korgkomponenterna. En hög korrelation mellan Korgkomponenterna kan ha en betydande påverkan på betalningsbara belopp. Den negativa utvecklingen för en Korgkomponent kan väga ut en positiv utveckling för en eller flera andra Korgkomponenter.

Betalningsbara belopp avseende Obligationerna är relaterade till värdet/utvecklingen för Korgkomponenten med sämst utveckling, oavsett värdet/utvecklingen på de andra Korgkomponenterna.

Betalning av inlösenbelopp och belopp för förtida inlösen för Obligationerna är villkorade av att värdet på eller utvecklingen för den Relevanta Underliggande Tillgången är större än eller lika med ett angivet barriärvärde, och om sådant villkor (ett "barriärvillkor") inte uppfylls. Vidare behöver barriärvillkoret uppnås genom värdet/utvecklingen på Korgkomponenten med sämst utveckling, oberoende av utvecklingen för de andra Korgkomponenterna.

Obligationerna kommer lösas in i förtid om det Relevanta Underliggande Värdet för Korgkomponenten med sämst utveckling på en Värderingsdag för Automatisk Förtida Inlösen är större än eller lika med angivet barriärvärde.
