Introducing the 2023 Students Rebuild Welcoming Refugees Project

Students Rebuild is teaming up with humanitarian aid organizations from around the globe. Together, we're teaching students about refugee crises and how small actions can make a big difference. By creating art, students can raise funds for these organizations to help change the lives of displaced families throughout the world. Here's how:

- 1 Dig deep!** Students can learn about welcoming refugees in their community and around the world, and begin to draw inspiration for their art. We provide the lessons and content guides.
- 2 Let's create!** Students can create artfully illustrated postcards that reflect culture, community and connection, to welcome our new friends!
- 3 We're almost there!** Send your artwork to us. For each piece of art received, the Bezos Family Foundation will make a \$5 donation—up to \$1.6 million—to organizations providing humanitarian relief around the world.

The World Needs Challenge runs from September 13, 2022 to June 2023.
