

Ridge Fit: Helping your Patients and Growing your Practice

March 11, 2022

Discover a Simple, Fast and Predictable
Approach to Treat Patients

Course Overview

Help edentulous patients who cannot undergo full arch reconstructive therapy or regenerative therapies to place “conventional” implants to support overdentures, due to financial or medical concerns. The ridge fit approach is a beautiful treatment option in these situations. Simple, fast and predictable, the ridge fit approach allows you to treat patients you would have turned away in the past, and grow your practice at the same time. Learn how.

Clinical Considerations:

- Choosing appropriate patients
- Guaranteeing case acceptance through effective consultation
- Surgical techniques
- Restorative techniques
- When is this a laboratory free approach?
- Setting a global fee
- Follow up care

Practice Growth Potentials:

- Accessing potential patient pools
- Engaging your referral partners
- Ridge fit as a “gateway implant”
- Converting Ridge Fit patients to hybrid cases
- Expanding the breadth of your referrals
- Improving the depth of your referrals
