

## Implant Complications and Failures: Prevention, Identification and Treatment

December 11-12, 2020

### Learning Objectives:

1. Prevent implant complications and failures
2. Predictably treat failing and failed implants
3. Minimize patient trauma
4. Maximize treatment outcomes
5. Create an effective implant warranty program
6. Take control of failures before they control you!

### Program Description:

Implant failure rates, including “failing” immobile implants, should be less than 1 percent after 10 years in function. Achieving such results requires expansion of diagnostic protocols, incorporation of more comprehensive treatment modalities, stricter definitions of regenerative and implant success, an evolved understanding of the impact of implant dimensions, composition and configuration on treatment outcomes, and the utilization of only the finest regenerative, implant and restorative materials.

**Bring complications and failures with you for discussion**

**Speaker:** Dr. Paul A Fugazzotto

**Date:** December 11-12, 2020

**Location:** The Fugazzotto Institute  
for Comprehensive Implant Therapy  
& Esthetics

25 High Street  
Milton, MA 02186

**Type:** Lecture/Live Surgery

**CE Credit:** 11 hours

**Tuition:** \$ 1,995.00
