

SOMADERM®

FREQUENTLY ASKED QUESTIONS:

Q. What is SomaDerm?

A. SomaDerm is a transdermal, somatropin based gel with homeopathic key ingredients. SomaDerm leverages powerful glandulars and natural botanicals in a comprehensive, one-of-a-kind blend that supports your body's ability to create high endogenous. These key ingredients empower your body to utilize its own powerful ability to produce youth preserving human growth hormone by up to 800%.

Q. What is Somatropin?

A. Somatropin is a protein that is manufactured to be biologically identical to the naturally occurring human growth hormone produced in the Pituitary Gland. Often times this is referred to as bioidentical HGH.

Q. What is Human Growth Hormone?

A. Human growth hormone is a key hormone in the endocrine system and is produced by the pituitary gland. This hormone helps promote growth during childhood; it reaches its peak around the age of 20 and begins to plummet around age 25. At this point the typical aging process begins where you may start to notice common signs of aging. This hormone slowly declines for the rest of your life unless you provide proper support for this important part of your endocrine system.

Q. How does SomaDerm leverage Homeopathy

A. SomaDerm leverages the 3 principles of homeopathy to elicit a response from the body's endocrine system. These three principles are Dilution or Microdosing, the Law of Opposites, and the Law of Similars. Through "water memory" or crystalline structure impressing, SomaDerm contains diluted key ingredients at an almost untraceable level that have had their molecular message imprinted on the crystalline structure of the water base. However, due to the molecular structure of these key ingredients being carried into the body, the body is able to recognize the messaging of these key ingredients on the water or crystalline structures. The body then responds to these messages in a way that triggers a response similar to what it would have had it been given a much larger external dose. This homeopathic method is much safer and avoids the dangers of giving your body massive amounts of exogenous substances that risk overburdening your endocrine system.

Q. Is HGH replacement therapy a substitute for a healthy lifestyle?

A. Although HGH has been looked at as a miracle drug or the Fountain of Youth, it shouldn't be used in place of a healthy lifestyle. Qualified medical professionals will always recommend a combination of a healthy diet and regular exercise in order to achieve the best results from HGH. For example, those who do not exercise may still achieve fat loss but will do so at a much slower rate than someone who combines the hormone with consistent exercise.

Q. Where Do I Apply SomaDerm?

A. Because hormones are stored in the fatty tissue layer, SomaDerm gel should always be applied to thin areas of skin, wherever veins are visible. This will ensure that SomaDerm gel is delivered transdermally, which aims at transporting the blend directly to the bloodstream. You may apply SomaDerm gel to your underarms, forearms, wrists, and behind the knees. Applied locations should be rotated so that no area of the skin gets overused.

Q. How Do I Use SomaDerm?

A. If you are using the new SomaDerm bottle with the new airless pump, make sure to use two pumps in the morning and two pumps at night. If you have yet to upgrade to the new pump and bottle and are using the original bottle, use one pump in the morning and one in the evening.

Q. Who Should not use SomaDerm?

A. It is not recommended that pregnant or nursing mothers or children use SomaDerm. Also, anyone with a significant health concern should consult their physician before use. As with any change in diet or supplements, it is always a good idea to consult your physician beforehand.

Q. How Do I Know the Quality of SomaDerm?

A. New U Life exclusively uses a Food and Drug Administration (FDA) registered manufacturing facility and complies with all FDA regulations. With extensive experience in regulatory compliance, New U Life adheres to all requirements for FDA product indications, label copy, and ingredient listings along with filing the appropriate drug product listing documentation with the FDA for all drug products manufactured for the U.S. sales.

Is SomaDerm Registered with the Food and Drug Administration?(FDA)

Q.

A. Yes, SomaDerm is registered with the FDA. However, it is important to note that SomaDerm is not FDA Approved.

What is the National Drug Code Number(NDC) Associated with SomaDerm?

Q.

A. SomaDerm gel NDC: 61877-0005-1. The Drug Listing Act of 1972 requires registered drug establishments to provide the FDA with a current list of all drugs manufactured, prepared, propagated, compounded, or processed by it for commercial distribution. Drug products are identified and reported using a unique, three-segment number, called the National Drug Code (NDC), which serves as a universal product identifier for drugs. The FDA publishes the listed NDC numbers and the information submitted as part of the listing information in the NDC Directory which is updated daily. The information submitted as part of the listing process, the NDC number, and the NDC Directory are all used in the implementation and enforcement of the Act.

Q. What tests have been done to ensure efficacy and safety?

A. SomaDerm has been on the market for over 15 years and has a reputation for safety and efficacy. SomaDerm is proudly made in the USA at an FDA certified facility, and New U Life has conducted third-party lab tests to ensure ingredient safety. New U Life is also in the process of conducting third-party studies to validate the efficacy of this revolutionary product.

PRODUCT CONSISTENCY AND RELIABILITY. According to FDA instructions, New U Life documents every step of the manufacturing process. New U Life consistently pioneers products by using quality raw materials, applying strict product testing, and using standardized manufacturing processes with each and every order.

QUALITY CONTROL TESTING. A quarantine of all inbound raw materials is mandatory until the quality and identity of those raw materials are verified. All raw material suppliers must provide Certificates of Analysis. During the manufacturing process, all water used undergoes microbiological testing in accordance with USP regulations. It is not until an extensive series of product testing is performed before the product is released.

FACILITIES. We use one of a small number of authorized homeopathic manufacturing facilities in the United States. New U Life is registered with and subject to inspection by the FDA and follows all current good manufacturing practices (cGMPs) as set forth by the FDA.

INGREDIENTS. Through our worldwide channel of ethical and reliable suppliers, we are able to acquire quality, raw ingredients. We use a United States Pharmacopeia (USP) state-of-the-art water purifying system for all of our non-GMO, gluten-free, organic alcohol.
