Our reputation wheelhouse goes beyond a single score to quantify and categorize reputation across different influencing factors. Our **7 Drivers of Reputation** provide insight into how stakeholders think about a company's key business areas. DAX40-listed companies demonstrate strong performance, but the real differentiator lies in their leadership and innovative capabilities.

Companies in this index are recognized for having clear visions for the future and excelling in managing and leading their organizations — strengthening their reputations and favorability with stakeholders. However, to maintain and further elevate their reputation, DAX40 companies must address areas that are lagging behind: Citizenship and Conduct. Investing in transparent, ethical practices and actively engaging in socially responsible initiatives are crucial steps. By adopting a holistic approach to reputation management, these companies can enhance stakeholder trust and achieve sustainable success in a competitive market.

Corporate reputation is an inherently ever-evolving business asset. That's why at RepTrak we rigorously monitor and analyze reputation data across diverse markets and sectors. Our deep data dives allow us to closely track reputational trends, and we are eager to share our latest findings with you.

We examined nearly 400 companies across 6 major global stock indexes. This comprehensive dataset is made from over 100K survey ratings and provides valuable insight into the drivers of corporate reputation across markets. The DAX40 index features 40 leading companies in Germany, and our analysis reveals the critical reputational strengths and gaps these companies must address to maintain their competitive edge.
