

EUROLUB ÖLBINDER PLUS (Feinkorn)

Plus binds liquids of all kinds on any solid surface. With its fine grain, Plus penetrates small cracks and depressions. Optimum slip resistance is achieved even with full saturation of the granules. Plus is very suitable for absorption tasks where high surface contact and rapid absorption is required, e.g. On traffic areas where fast absorption and cleaning up is often crucial.

Application: <ul style="list-style-type: none"> - calcined - quick-acting - easy to hang up 	<p>Plus can be preventative or used in case of damage, is easy to spread and to brush up again. Plus is effectively screened, therefore has a very low content of small particles and is therefore safe to use under all conditions.</p> <p>The thermal treatment (calcination) means that the granules remain hard even after complete saturation. Liquids are effectively absorbed and encapsulated, and the surface becomes clean and dry.</p> <p>Disposal will take place either through the landfill or incinerator in accordance with applicable regulations for the liquid in question.</p>
