

PRODUCT INFORMATION

EUROLUB Zink-Spray

Category:	Corrosion inhibitors
------------------	----------------------

Product Features:	Zinc spray contains 99.5% of pure zinc and serves as corrosion protection for the pretreatment of unpainted metal sheets when spot welding and is suitable for repairing damaged surfaces with galvanized materials. Particularly suitable for re-galvanizing welds and interfaces on metal surfaces.
--------------------------	-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

Application:	Shake well, after which the ball can be heard further shake for about 2 minutes. The surface to be treated must be dry and free of dust. Spray distance of about 30 cm. Only thin layers of spray. Avoid sun and wind. After use, turn can upside down and spray valve empty.
