

PRODUCT INFORMATION

EUROLUB Karosseriedichtmasse MS

Category: Sealant and adhesive

Product Features:

High-quality single-component adhesive and sealant MS polymer basis for super-strong, high-quality compounds, universally applicable.

dynamic and elastic high resilient with high initial strength, broad range of adhesion and excellent sealing properties.

MS body sealing compound can be painted (paint compatibility test before), silicone, solvents, isocyanates, aging, weathering, UV and water-resistant and vibration-reducing.

MS Body sealing compound is suitable for safe, permanent and dynamically stressed bonds and seals in the car body, vehicles, containers, case of structures for trucks, vans and special vehicles in the container and equipment construction, ship and boat building and more

Applications in the automotive sector: wheel, spoiler, rear panel, side panel, fender, vehicle underbody, Luggage compartment floor, floor in the passenger compartment, fuel tank filler neck, seams at the front and rear bumper and much more.

Handling: Use cartridge pistol. Before applying the adhesive surfaces must be dry and free of grease and solvents. Because of the variety of paints, primers and different plastic surfaces, we recommend technical preliminary tests.

EAN: Art.Nr. 00255 6 black 290 ml 4025377002552

Delivery: Art.Nr. 00255 6 black 12 x 290 ml Plastic cartridge

PRODUCT INFORMATION

Technical data:	
Chemical basis:	Adhesive and sealant based on MS polymer.
Density:	1,53 g/cm ³
Temperature resistance:	-40 °C bis +100 °C
marking:	See section 15 of the current EC safety data sheet.
general information:	Store cool and dry! If stored properly tenable at least 9 months

The data provided are subject to change. Operating rules of the manufacturer. Characteristics are typical of current production data are subject to change. This should describe the products and should not therefore intended to assure certain properties. Obligation can not be derived.
