

## Disclosure of items to be brought in through the security check for personnel/vehicles, for use in the monitored area

### Items

Items in accordance with item description no. 1 that are to be brought into monitored area must be approved by the visitor recipient and the Security Manager before entry of goods is granted.

Products in accordance with item description no. 2 that are to be brought into *monitored* area, by **service personnel/service vehicle**, must be approved by the visitor recipient and the Chemical Group at OKG before entry of goods is granted. Product name in accordance with the safety data sheet, preferably supplemented with OKG's item number, shall be given below. A copy of this form and the safety data sheet/-s shall be stored at a location adjacent to the storage of the chemical products. Upon completion of the work, chemical products and packaging shall be removed from OKG.

Handling of *goods* containing chemical products takes place in accordance with the procedures in force at OKG's Goods Receiving Station, in compliance with the list of approved chemicals. Chemical products not registered in OKG's list of chemicals must be handled by the use of form no. D171.

Only unbroken packages containing chemical products may be brought into OKG. "The term chemical product refers to chemical substance or mixture of several substances, for industrial or commercial use", and which comes in the form of pressurized container, aerosol container, flammable liquid and the like.
