22 March 2024**

The 6th International Conference on Applied Surface Science (ICASS) will take place on 17-20 June 2024 in Waterside hotel, Wuzhen, Zhejiang, China

The conference is organized by the journal Applied Surface Science and will provide a forum for researchers in all areas of applied surface science to present their work.

ICASS will report on and discuss current research on the role and use of surfaces in chemical and physical processes, related to catalysis, electrochemistry, energy, new/functional materials and nanotechnology. Also, the various techniques and characterization methods will be discussed. There will also be opportunity to participate in workshops specially focused on early- and mid-career researchers. These workshops will be free of charge and take place in the afternoon prior to the beginning of the conference.

Chair

Yang Shen, Tsinghua University, China

Committee

Rie Makiura, Osaka Metropolitan University, Japan

Jennifer Strunk, University of Rostock, Germany

Kijung Yong, Pohang University of Science and Technology, Korea

James E. Whitten, University of Massachusetts Lowell, USA

Zhong-Shuai Wu, Dalian Institute of Chemical Physics, Chinese Academy of Science, China
