PeraHealth Appoints Greg White as Chief Executive Officer

Senior healthcare IT executive selected to lead clinical surveillance company's next phase of growth

CHARLOTTE, N.C. – November 1, 2018 – PeraHealth, a provider of predictive, real-time clinical surveillance solutions, announced the appointment of Greg White as its chief executive officer. He will assume day-to-day leadership of the Company beginning November 1, 2018 and will also join PeraHealth's Board of Directors.

With more than 30 years of experience, White is an accomplished executive who has driven growth and performance across businesses that range from early stage venture-backed companies, to divisions of large healthcare IT companies and international businesses. Throughout his career, he has worked alongside boards and senior executives to consistently execute strategy, and assemble productive and collaborative teams to achieve business objectives – showcasing his leadership and tenacity to drive results.

"PeraHealth has built a strong reputation around its health IT innovation and the immense value it brings to providers across the U.S. Collaboration is key, and I plan to work closely with existing and future customers and help them create a safer, more effective and predictable care environment for their patients," said White. "I am also excited to work with such strong leadership and team of dedicated employees to continue the company's strategic vision of transforming the way healthcare is delivered. The Rothman Index is at the forefront of predictive analytics in healthcare, and it is my goal to further the company's success to help save lives."

White comes to PeraHealth from PerfectServe, a clinical communications company, where he served as chief operating officer since 2016. Previously, he was senior vice president and general manager of Allscripts Healthcare Solutions' TouchWorks EMR Division, where his team focused on revenue growth, product quality and Meaningful Use regulatory compliance. He also served in domestic and international leadership roles at Cerner Corporation.

"After an extensive search, we're thrilled to add Greg's healthcare IT expertise and passion to the PeraHealth executive team, continuing the company's important work of preventing avoidable death in hospitals across the country," said Michael Rothman, PhD, PeraHealth's co-founder and chief science officer. "His collaborative leadership style, ability to build strong partnerships, and deep understanding of the healthcare IT market will help providers and others in the healthcare continuum to leverage technology that enables more meaningful prediction and improves patient outcomes."

About PeraHealth

PeraHealth is transforming healthcare through the intelligent use of data. PeraHealth solutions, powered by the Rothman Index, provide a visual representation of the patient's condition and progress in real time. Leading hospitals and health systems use PeraHealth predictive analytics to improve quality reduce cost, and to help them achieve their goals of reducing all-cause mortality, length of stay, and readmissions.
