

# LILLY DELIVERS INSULIN AFFORDABILITY SOLUTIONS

Although the vast majority of people have affordable access to their Lilly insulin—in fact, 95% of prescriptions at the retail pharmacy are approximately \$95 or less a month for an entire prescription—there are still gaps in the U.S. health care system that leave some Americans struggling to afford their medication. No one should have to ration insulin when managing their diabetes, which is why Lilly offers a suite of affordability programs that are designed to help people reduce out-of-pocket expenses, especially those without insurance, seniors in Medicare Part D, and people with high-deductible health plans. People who use Lilly insulin can find out about these programs by calling the **Lilly Diabetes Solution Center**.

**LILLY INSULIN VALUE PROGRAM <sup>1</sup>**  
 Covering most Lilly insulin formulations, the uninsured and anyone with commercial insurance can fill their monthly prescription for \$35. Individuals can contact the Lilly Diabetes Solution Center to inquire about eligibility and participation.

**LILLY'S NON-BRANDED INSULINS <sup>2</sup>**  
 Lilly currently offers three non-branded insulins with a list price 50 percent lower than their brand name alternative. These can be ordered by any pharmacist and are typically delivered in 1–2 business days.

**AUTOMATIC DISCOUNT <sup>3</sup>**  
 Lilly provides automatic discounts at the retail pharmacy for anyone with commercial insurance. These discounts cap the cost of an entire month's prescription at approximately \$95.<sup>4</sup>

**DONATIONS AND IMMEDIATE NEED**  
 Lilly donates insulin for distribution at free clinics and to charitable organizations for immediate insulin needs at no cost to qualifying patients with significant financial challenges.

**PART D SENIOR SAVINGS MODEL**  
 Beginning in January 2021, Lilly intends to include available formulations of Lilly's insulins for no more than \$35 for a 30-day supply to seniors in participating Medicare Part D insurance programs.

**Up to 20,000 people were helped each month in 2019, and the average out-of-pocket spend among people using our savings programs decreased by more than 65 percent in 2019.**

1. Terms, conditions, and limitations apply to the co-pay cards. Not available to those patients with government insurance such as Medicaid, Medicare, Medicare Part D, TRICARE®/CHAMPUS, Medigap, DoD, or any State Patient or Pharmaceutical Assistance Program.  
 2. A patient can work with their pharmacy to obtain Lilly's lower-priced insulin options. A patient should contact the Lilly Diabetes Solution Center if they are unable to get it through their pharmacy for any reason.  
 3. People without insurance are eligible but must contact the Lilly Diabetes Solution Center to participate.  
 4. Lilly offers savings programs designed to limit out-of-pocket costs for Lilly insulins. The vast majority of commercially insured and uninsured patients can expect the out-of-pocket cost for their prescription to be \$95 or less at the retail pharmacy. Pharmacy and uninsured patients must participate; government beneficiaries are excluded, and some limitations apply.
