Numbers of days with traffic delays > 10 minutes	5	3	66.7%	5	3

ENDS

1. Due to data availability, all international passenger numbers (including PCP, prior corresponding period comparisons) are based on Confirmed Airline Passenger (CAP) data. As per previous information releases, these figures may contain estimates with any adjustments to preliminary statistics included in the year-to-date results in future months.
2. Includes Domestic-on-Carriage.
3. All data is for arriving and departing international passengers. All data is taken from management accounts, is provisional and subject to revision. All data has been rounded to the nearest thousand and in some instances the total may not be equal to the sum of the parts. Percentage changes have been calculated based on actual figures.
4. The percentage of flights which departed within 0-15 mins of the scheduled off block time. First departure for the day before 9am.
5. The airside movement of an aircraft from the moment it touches down on the runway to arriving at the boarding gate.
6. The time it takes for 90% of passengers to clear immigration after they disembark from their flight.

About Sydney Airport

Sydney Airport is Australia's international gateway and at the heart of the country's domestic aviation network. Part of the social and economic fabric of Sydney for more than 100 years, Sydney Airport is continually striving to deliver on its purpose – to make Sydney proud every day. Prior to COVID, Sydney Airport welcomed more than 44 million passengers annually, generated more than \$42 billion in economic activity (equivalent to nearly 7% of NSW's Gross State Product), and directly and indirectly supported 336,000 jobs.
