

# Vloeipapier

## Basis voor patroon

Versie: Rev20230918

### Stappenplan

- 1. Laat het document formaat ongewijzigd & maak het bestand op in de laag “**Ontwerp**”. Gebruik hiervoor CMYK kleuren.
- 2. Sla het bestand op als PDF bestand zonder snijtekens of extra afloop. Gebruik bij voorkeur de voorinstelling PDF/X-1a:2001.
- 3. Controleer je PDF op juistheid voor het aanleveren.

*Werk je niet vanuit Adobe Illustrator? Verwijder dan alles wat niet gedrukt hoeft te worden. Verwijder ook de lagen “**Template**” en “**Informatie**”.*

*Lever je bestand aan op het formaat **50 x 50 mm**.*

### Legenda

- - - Aflopend formaat, tevens aan te leveren formaat
  - Uiteindelijk afgewerkt formaat
  - - - Advies veiligheidsmarge
  - Bedrukbaar gebied
  - - - Vouw of rillijn
- Items in deze kleur zijn illustratief.
- Items in deze kleur zijn (semi) transparant.
- Items in deze kleur zijn optioneel en afhankelijk van de gekozen product opties.

Schaal 1:1

De minimale CMYK-waarde voor bedrukking is: C10%, M10%, Y20% en K10%.

the 1990s, the number of people in the world who are under 15 years of age has increased from 1.1 billion to 1.6 billion, and the number of people aged 65 and over has increased from 0.5 billion to 0.7 billion (United Nations 2002).

There are a number of reasons why the world population is ageing. One of the main reasons is that the number of people who are living longer is increasing. This is due to a number of factors, including improved medical care, better nutrition, and a more stable environment.

Another reason why the world population is ageing is that the number of people who are having children is decreasing. This is due to a number of factors, including a higher cost of living, a higher level of education, and a higher level of employment for women.

The world population is ageing, and this is a trend that is likely to continue for many years to come. This has a number of implications for the world, including a need for more social security, a need for more health care, and a need for more education.

There are a number of ways in which the world can deal with the ageing population. One way is to increase the number of people who are working, so that there are more people who are contributing to the social security system.

Another way is to improve the health care system, so that people are able to live longer and healthier lives. This can be done by increasing the number of health care workers, by improving the quality of health care, and by increasing the amount of money that is spent on health care.

There are a number of other ways in which the world can deal with the ageing population. These include increasing the number of people who are retired, increasing the number of people who are volunteering, and increasing the number of people who are working in the informal sector.
