BENEFITS OF A FITCH RATING

A rating from Fitch increases the marketability of non-public financing transactions as well as helps provide capital charge relief to investors who are subjected to NAIC (National Association of Insurance Commissioners) or other specific internal investment policies.

Fitch delivers superior service by providing:

- Industry expertise across asset classes including Corporates, Infrastructure & Project Finance and Commercial Real Estate
- Timely feedback
- Transparency in the rating process

KEY RATING DETERMINANTS CREDIT OPINIONS*

Regression-based Model Credit Opinions

Issuer Default Credit Opinion (IDCO) from regression-based model is driven primarily by four major inputs:

- Revenue
- EBITDA
- Total Debt
- Interest Expense

Final IDCO, security level rating and recovery rating are subjected to an analytical overlay including:

- News Check
- Liquidity Analysis

Analyst-based Credit Opinions

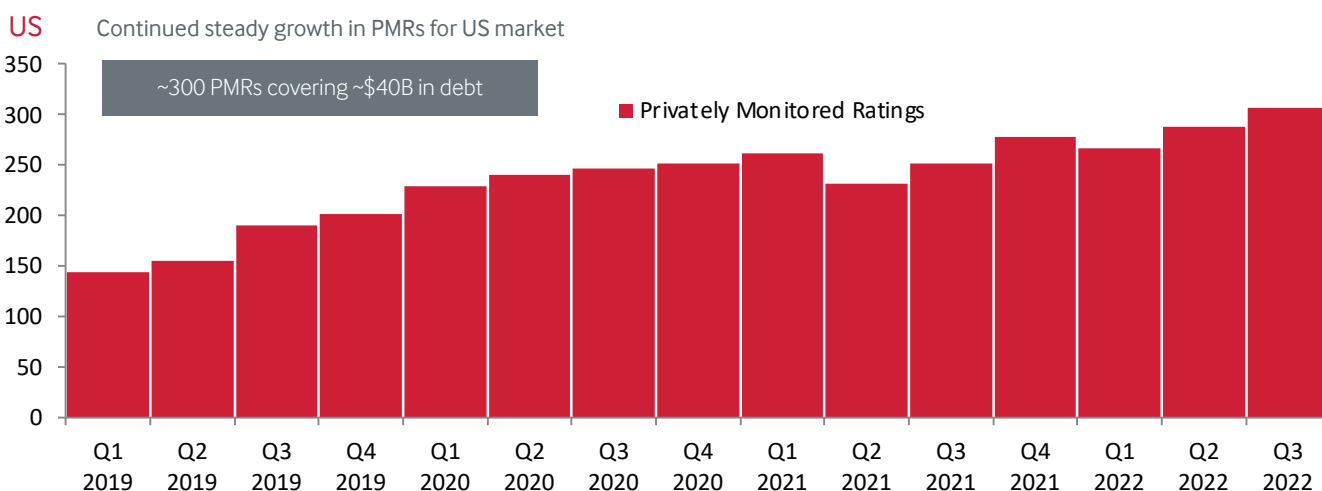

IDCO from analysts is derived from a robust analytical process by sector experts.

Credit opinions (COs) use a published rating scale, but either omit certain analytical characteristics of a rating, or match them to a lower standard than in a credit rating. The limitations of COs, compared to a rating, include: "point-in-time" coverage, limited information availability and review, an abbreviated surveillance review process in certain cases, and reduced robustness of outlooks and watch status. These limitations are consistent with the terms of their application within a pooled asset context, and are clearly signaled in the notation used to identify COs.

* In the United States, credit opinions are typically completed for a pool of loans to be used for CLO or Loan Fund ratings. In Europe, credit opinions are offered for individual credits or as part of a program.

Note: Annual financial statements should be audited by an accounting firm that is registered with the Public Company Accounting Oversight Board (PCAOB) and be in good standing with the PCAOB. In the event that audited financial statements are not available for the initial rating (for example a spinout from a larger conglomerate), it is expected that the future audited statements would be audited by a PCAOB registered accounting firm and a quality of earnings should be provided in place of the audit. Confirmation required from requestor that financials will be audited over the next 12 months before analytical work commences.

Note: Please note that this is not a comprehensive list and it is in the analysts' discretion to request additional information / documentation to complete a Private Monitored Rating.
