

# News Sentiment, on Fitch Ratings PRO

A curated news service with sentiment indicators to help you monitor your portfolio and inform credit risk decisions

Cut through the noise, prioritise the stories that matter, and assess risks affecting your portfolio, with cutting-edge credit-focused media curation and evaluation technology.

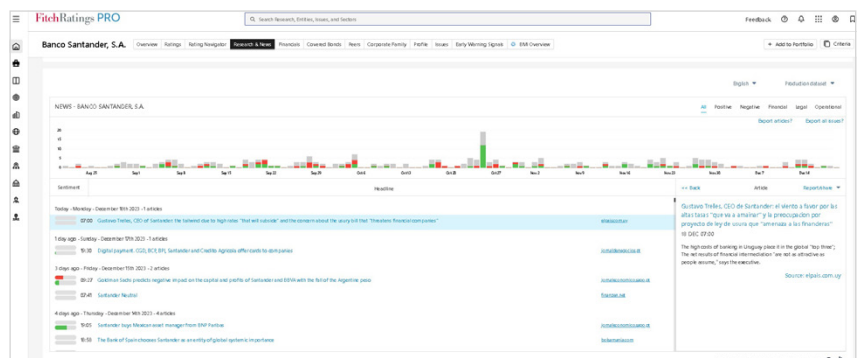

News Sentiment, powered by Owlin technology, covers a minimum of 4000+ banks and 115 sovereigns.

News Sentiment uses machine-learned named-entity recognition and cutting-edge natural language processing techniques. The tool scans through countless multilingual articles from over 2000 credible international, national and trade news sources. It then posts only those articles that are relevant into your feed, in the language of your choice.

Each article is scanned, categorised and assigned a sentiment score within a few minutes of being published, so you get the full forward-looking picture. Scores range from positive to negative on a colour graded scale, so you can see at a glance what the article relates to and its potential impact on credit risk decisions.

## News Sentiment can help you:

- Complement your data and research resources with a holistic view of unstructured news data from thousands of sources worldwide, delivered within minutes in a language of your choice.
- Prioritize which stories merit further investigation at a glance, based on their risk score and the volume of coverage on a topic.
- Validate and enhance your analysis, pick up early warning signals and stay abreast of current events that may become material to credit profiles.

News Sentiment is served up with all the other data and research you've chosen to receive from Fitch Ratings | Research & Data, on our Fitch Ratings PRO web portal.

### Capture early warnings

News Sentiment assists users in their daily workflows by continuously scanning the news for any material stories or events, and providing sentiment indicators for a forward-looking perspective, helping with proactive decision-making.

### Sift the signals from the noise

News Sentiment collects, clusters and filters relevant news at portfolio and entity level. Extensive filtering options, by positive and negative sentiment, risk theme and source help you to save time and sift the signals from the noise.

### Global and multilingual

Thousands of sources are monitored continuously, across multiple languages, geographies and in near real-time. Powerful machine translation ensures that signals are picked up across language barriers.

### Intuitive Web Interface

Powerful and intuitive desktop interface that is fully integrated with your Fitch Ratings PRO workflow. Navigate effortlessly through the most important news events across your portfolio, conduct further research on specific entities, and set up alerts.

## Client Services

A dedicated team of client service professionals based in New York, London, Hong Kong, Singapore and Tokyo provide 'follow the sun' support. Please email us at [fcustomersupport@fitchsolutions.com](mailto:fcustomersupport@fitchsolutions.com) for assistance.

## About Fitch Ratings | Research & Data

Fitch Ratings | Research & Data helps credit, risk, and investment professionals make better-informed decisions and meet regulatory requirements, within and beyond the rated universe. We do this by bringing together the rigorous analysis and deep expertise of 1,400+ Fitch Ratings analysts and the supporting data, models and methodologies, plus workflow-enhancing analytical tools. All to help you make decisions with confidence.

Fitch Ratings | Research & Data is a business unit of Fitch Solutions, a sister company of Fitch Ratings. Fitch Solutions is a part of the Hearst-owned Fitch Group, a global leader in financial information services with operations in more than 30 countries.
