

Fitch Sri Lanka National Ratings 2024 Transition and Default Study

Study Overview: This study provides data and analysis of the performance of Fitch Ratings' portfolio of Sri Lanka corporate finance. This analysis includes both financial and non-financial corporate issuers, over the long-term period from 2000 to 2024.

No Defaults: There were no defaults in 2024 for all corporate finance issuers in Sri Lanka with national ratings assigned by Fitch.

Fitch Sri Lanka National Ratings: This report should be read in conjunction with Fitch's [National Scale Rating Criteria \(December 2020\)](#).

Fitch Sri Lanka National Ratings Transition and Default Methodology

Fitch's Sri Lanka national scale ratings transition and default statistics include all publicly rated corporate finance, Long-Term Issuer National Ratings from 2000 to the present. Fitch's continuing data enhancement efforts and methodology changes may result in slightly different statistics than in previously published studies. Therefore, the most recent study supersedes all prior versions.

The rating transitions outlined in this study represent a distinct historical period and may not represent future rating migration patterns. Transition rates are influenced by a number of factors, including macroeconomic variables, credit conditions and corporate strategy. Examining the performance of Fitch's ratings on a relative scale within each rating category can be beneficial.

Transition Rates

Fitch employs a static pool approach in calculating transition and default data. The static pools, or alternatively, cohorts, are created by grouping issuer ratings based on the year in which the ratings were active and outstanding at the beginning of that year. For example, issuers with ratings outstanding at the beginning of 2003 constitute the 2003 cohort, with the same true for additional cohorts. Issuers newly rated by Fitch in any given year are included in the following year's cohort.

Issuer ratings may reside in multiple cohorts, as long as the ratings are outstanding at the beginning and end of the year or multiple-year horizons under observation. For example, the annual performance of an issuer rating initiated in 2003 and, therefore, outstanding at the beginning of 2004 and withdrawn in 2007, would be included in the 2004, 2005 and 2006 cohorts. The rating performance over multiple-year horizons would also be included in the two- and three-year cohorts and included in the four-year transition rates as a transition to withdrawn.

In contrast to corporate finance, where issuer ratings are used, structured finance cohorts are created by grouping security ratings. The tracking of rating performance of all structured finance securities in each cohort is similar to that of corporate finance, with the inclusion of ratings outstanding at the beginning of a respective year. Similar to corporates, ratings withdrawn (WD[Ika]) or paid in full (PIF[Ika]) during the course of a year are excluded from subsequent cohorts as they are no longer active. However, they are included in the transition data as a transition to withdrawn in the WD(Ika) column or PIF in the PIF(Ika) column, respectively.

In addition, comparisons with earlier Fitch Sri Lanka National Ratings transition and default statistics or studies should be viewed within the context of the differing methodologies, whether rating movements were analyzed across the broad rating categories or at the notch level (+, -).

An examination of the 2024 one-year rating transition data at the major rating categories on page one, Sri Lanka Corporate Finance National Ratings One-Year Transition Matrix: 2024 Cohort, reveals the movement of ratings both up and down the rating scale, such as from

'A(Ika)' to 'BBB(Ika)'. The vertical left-hand column identifies ratings outstanding at the beginning of 2023, while the horizontal axis shows the migration pattern of those ratings by year-end.

The table reads from the top left-hand corner, beginning with 'AAA(Ika)' and following the diagonal to the right to examine the stability of each consecutive rating category.

Default and Impairment Rate Calculations

Fitch's definition of default can be found on the agency's website under [Rating Definitions](#).

In corporate finance, defaults are relatively easily identified, often through missed payments, distressed exchanges or bankruptcy filings. Furthermore, they are typically strongly associated to unrecoverable losses. In contrast, defining defaults within structured finance is a more complex, as payment shortfalls may be temporary or permissible under the terms of bond indentures. Certain structured bonds include features that allow notes to defer interest or make payments in kind. Some structured securities may experience temporary interest shortfalls that are inconsequential to deal performance and are resolved relatively quickly.

Finally, structured bonds may also experience write-downs to the original face value, but continue to be active for extended periods of time. For the purposes of this study, Fitch tracks impairments, or defaults and near defaults, including bonds rated 'CC(Ika)' or below. This category includes bonds in payment default and those where a default of some kind appears probable. There is a possibility that some defaults identified in this study will be subsequently resolved.

Fitch's default and impairment rates are calculated by issuer or security rather than by the par amount. First, defaults or impairments are examined by year for each cohort and individual rating category. For example, if 25 issuers defaulted in 2003 and the 2003 cohort contained 2,000 issuer ratings, the resulting annual default rate for all ratings in 2003 would be 1.25%. If 10 of these defaults consisted of defaults among issuers rated 'BB(Ika)' at the beginning of the year and the 'BB(Ika)' cohort at the beginning of the year totaled 500, the 'BB(Ika)' in 2003 default rate would be 2%, representing 10 out of 500.

Fitch calculates average annual default or impairment rates by weighting each cohort's default or impairment rates according to the number of ratings outstanding in the given cohort relative to the number of total ratings outstanding for all cohorts. Following the example above, the 2003 'BB(Ika)' annual default rate of 2% might be followed by a 2004 'BB(Ika)' annual default rate of 1%.

A straight average of these two rates would ignore potential differences in the size of the two cohorts. Instead, weighting the results based on the relative number of 'BB(Ika)' ratings outstanding in 2003 and 2004 gives greater emphasis to the results of the 'BB(Ika)' cohort with the most observations. The same technique is used to calculate average default or impairment rates over multiple-year horizons.

DISCLAIMER & DISCLOSURES

All Fitch Ratings (Fitch) credit ratings are subject to certain limitations and disclaimers. Please read these limitations and disclaimers by following this link: <https://www.fitchratings.com/understandingcreditratings>. In addition, the following <https://www.fitchratings.com/rating-definitions-document> details Fitch's rating definitions for each rating scale and rating categories, including definitions relating to default. Published ratings, criteria, and methodologies are available from this site at all times. Fitch's code of conduct, confidentiality, conflicts of interest, affiliate firewall, compliance, and other relevant policies and procedures are also available from the Code of Conduct section of this site. Directors and shareholders' relevant interests are available at <https://www.fitchratings.com/site/regulatory>. Fitch may have provided another permissible or ancillary service to the rated entity or its related third parties. Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed. Fitch Ratings makes routine, commonly-accepted adjustments to reported financial data in accordance with the relevant criteria and/or industry standards to provide financial metric consistency for entities in the same sector or asset class.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
