COLOR TECHNIQUE

① BASE

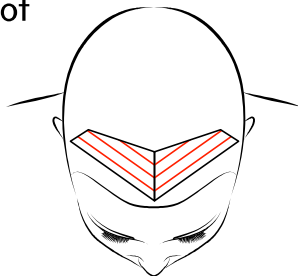

Apply formula **A** to all the roots of the hair.

② LIGHTS

Create a large chevron section in the top and side of the head. Take thick slices and saturate the lengths and ends with formula **C**.

Leave a slice of hair between each foil & apply formula **B**.

③ ACCENT

Starting at the nape, alternate formula **A** & **B** through the lengths and ends.

On some sections, apply formula **A-B-A** for a marbled effect.

Develop up to 40 minutes.

COLOR TECHNIQUE

④ TONER

Apply formula **D** to the hair and comb through.

Develop for 20 minutes.

⑤ CARE

To complete the coloring process, the **NEW ULTIMATE COLOR, Color Sealer Liquid Layer** is used to re-balance the hair's pH and seal the cuticle layer. This instant, no wait post-color treatment is crucial for finalizing the technical process.

“Layering light and dark panels on curly hair is the best way to enhance the shape of the curl. Koleston Perfect and Color Touch give incredible shine on curls.”
