

SURREAL COLOUR CYCLE

Like every colour journey, the Surreal Colour trend comes with a commitment, but one that transforms your hair from your very first appointment, the Surreal Colour life cycle is designed to evolve with you, ensuring your hair looks strikingly surreal at every stage.

Starting with the full surreal service application that pushes boundaries of light dimension and tone, your stylist will map out a personalised plan to maintain the surreal effect as the colour softens over time.

This includes Gloss or Glaze top-ups, and tailored at-home care to maintain colour and condition.

From vivid intensity to dreamy fades, the Surreal Colour life cycle celebrates every phase so your hair always makes a statement, right up to your next appointment.
