Overview

Guideline Objective

- To provide the components of diabetes care, general treatment goals and guidelines, and tools to evaluate quality of care
- To offer guidance on the management of retinopathy, neuropathy, and foot care in diabetes

Patient Population

Adult patients with diabetes

Recommendations

Recommendation Statements

Major interventions covered in this guideline include:

- Risk reduction, screening, and treatment interventions for diabetic retinopathy, including visual rehabilitation
- Screening and treatment for diabetic neuropathy
- Foot care, including routine comprehensive evaluation, history, referral to specialist, preventive self-care education, use of specialized therapeutic footwear, and adjunctive treatment

Note: Full recommendation statements have not been provided because this guideline does not meet EGT's systematic review of the evidence criteria. Refer to the original guideline for more information.
