Overview

Guideline Objective

To provide recommendations on diagnosis, management, and follow-up of celiac disease (CD) in children and adults

Patient Population

Children and adults with suspected or diagnosed CD

Recommendations

Recommendation Statements

Major interventions covered in this guideline include:

- Indications for CD testing
- Diagnostic strategies for individuals on a gluten-containing diet or following a gluten-free diet (GFD)
- Role of biopsy
- Indications for gluten challenge and genetic testing
- Preventive care, including vaccination
- Monitoring of GFD adherence
- Guidance on use of probiotics

Note: Full recommendation statements have not been provided because this guideline does not meet [EGT's systematic review of the evidence criteria](#). Refer to the [original guideline](#) for more information.

Evidence Rating Scheme

Refer to the original guideline documentation for more information.

Recommendation Rating Scheme

Refer to the original guideline documentation for more information.
