Overview

Guideline Objective

To provide recommendations on diagnosis, treatment, and follow-up of gastric cancer

Patient Population

Patients with suspected or confirmed gastric cancer

Recommendations

Recommendation Statements

Major interventions covered in this guideline include:

- Diagnosis, staging, and risk assessment, including biopsy, physical examination, imaging, and referral to geneticist
- Management of local/locoregional disease, including surgery, peri-operative chemotherapy, and adjuvant treatments
- Management of advanced/metastatic disease, including first- and second-line treatment options, surgery, early palliative care referral, and nutritional support
- Considerations for follow-up, long-term implications, and survivorship

Note: Full recommendation statements have not been provided because this guideline does not meet [EGT's systematic review of the evidence criteria](#). Refer to the [original guideline](#) for more information.

Evidence Rating Scheme

Refer to the original guideline documentation for more information.

ECRI's Guideline Profiles are designed to provide information and assist decision-making. Variations in practice will inevitably, and appropriately, occur when clinicians take into account the needs and preferences of individual patients, available resources, and limitations unique to an institution or type of practice. Every healthcare professional using these Guideline Profiles is responsible for evaluating the appropriateness of applying them in a clinical setting.
