Overview

Guideline Objective

To provide recommendations that allow the clinician in managing premature ejaculation (PE) and delayed ejaculation (DE) to conduct appropriate investigation, provide education, and offer available treatments that are rational and based on sound scientific data

Patient Population

Patients with PE or DE

Recommendations

Recommendation Statements

Major interventions covered in this guideline include:

- Diagnostic evaluation and testing
- Considerations for defining PE and DE
- Guidance on use of pharmacotherapy
- Counseling on the role of behavioral approaches, alternative therapies, surgical management, and non-pharmacological strategies

Note: Refer to the original guideline for full recommendation statements.

Evidence Rating Scheme

Refer to the original guideline documentation for more information.

Recommendation Rating Scheme

- AUA Guidelines-At-A-Glance Mobile App is available for Android and iOS.

Patient Education

No patient education materials available.

Disclaimer

If you desire to use content from the original clinical practice guideline cited herein, you must contact the guideline developer directly to obtain permission rights.

ECRI's Guideline Profiles are designed to provide information and assist decision-making. Variations in practice will inevitably, and appropriately, occur when clinicians take into account the needs and preferences of individual patients, available resources, and limitations unique to an institution or type of practice. Every healthcare professional using these Guideline Profiles is responsible for evaluating the appropriateness of applying them in a clinical setting.
