Overview

Guideline Objective

- To provide the components of diabetes care, general treatment goals and guidelines, and tools to evaluate quality of care
- To offer guidance on the diagnosis and classification of diabetes

Patient Population

Patients with suspected or confirmed diabetes

Recommendations

Recommendation Statements

Major interventions covered in this guideline include:

- Screening and diagnostic testing, including hemoglobin A1C and plasma blood glucose
- Classification of hyperglycemia
- Screening and management considerations for type 1 diabetes, prediabetes and type 2 diabetes, pancreatic diabetes, cystic fibrosis-related diabetes, posttransplantation diabetes, monogenic diabetes syndromes, and gestational diabetes

Note: Full recommendation statements have not been provided because this guideline does not meet EGT's systematic review of the evidence criteria. Refer to the original guideline for more information.

Evidence Rating Scheme

Refer to the original guideline documentation for more information.

Recommendation Rating Scheme

Refer to the original guideline documentation for more information.
