Bloom

The Air-Pot system guarantees better plants, with better root systems.

These fabulous roots mean you can achieve faster growth and amazing harvests, with less steps in the growing process. For instance you start off in our prop cell, grow on in a #3 and finish in a #12.

Our Air-Pot Hydro range of containers are ideal for any indoor or outdoor growing situation.

They are suitable for growing plants in a wide range of media, from soil based mixes and manufactured composts, through to expanded clay, coco fibre or rock wool.

The future has taken shape

www.air-pot.us

All over the world expert growers rely on Air-Pot containers to produce the best quality plants.

The secret is in the unique shape of the Air-Pot wall.

When the tap root reaches the base, increased air in the growing medium dehydrates the tip, pruning it and stimulating lateral root branching.

Each of the lateral roots is then steered by the shape of the wall towards an air hole, where it is also air-pruned, causing yet more branching.

The process is continually repeated until the plant has developed a dense mass of fibrous roots. This awesome root structure leads to increased take up of nutrient and water, faster growth, healthier plants and incredible yields.

THE AIR-POT RANGE

PROP

Prop Cell

0.3gall - 1 litre Height 5.7" Diameter 4.4"

The best start for your precious seedlings.

#1

0.8gall - 3 litre Height 8.6" Diameter 7.7"

Great for cuttings, seedlings and young plants.

GROW

#2

1.3 gall - 5 litre Height 9.3" Diameter 9.1"

Perfect for small plants in any growing medium.

#3

2.4gall - 9 litre Height 10.8" Diameter 10.6"

Ideal for medium size plants grown in soil, coco and hydro.

#5

3.4gall - 12.5 litre Height 10.8" Diameter 12.0"

Great for full term growth up to 6', also for long term growing. A soil grower's favorite.

BLOOM

#7

5.4gall - 20 litre Height 12.4" Diameter 14.0"

The best solution for full term growth from 4' to 6'. With a 13.5" footprint. This is also great for long term growing.

#12

10.1gall - 38 litre Height 14.8" Diameter 16.8"

Fantastic for long term growth of plants up to 8'. Ideal for mother plants.

DIY Walls

Height 14.8"

Designed for outdoor use with no base. Volume is unlimited depending on the number of walls joined together.
