## Chandelier A009

A monumental piece that floats gracefully. This piece was designed to offer both soft ambient light as well as a spot light that shines directly down from the central element. This piece was also designed out of components, and comes in a pendant and sconce configuration. Shown here in teal glass, other color options are available upon request. The central tube, inside of the teal glass is a prismatic acrylic with a diamond point pattern and is illuminated by independently controlled LEDs hidden in the rim at the top of the pendant component.

Sconce A017

---

An elegant arcing sconce that is perfect for a lounge seating group or over a polished table setting. The sharp metal ring that shields the glass is attached at the main fixture arc, and then further down a uniquely shaped simple opal glass form is supported, teetering just at the edge of the main metal structure. With a delicately beautiful wall bracket this piece is an understated standout.
