| Role title: React Developer | |
| Reports to: Lead Developer | Type of role: Volunteer / Unpaid |
| Location: London | |

**Purpose of the role**

This role exists because...

Pride in London is building a brand new website using the latest technology to create a foundation to build on over the next 5 years. We made a start last year and decided on our tech stack, but we need more help to finish the new website and make continuous improvements until Pride in July 2019.

What you'll get out of it

You'll be working with a modern tech stack (React, Gatsby, GraphQL) on a project that's mostly greenfield at this point. If you're a less experienced dev, it's a great way to build solid developer skills. For those with more experience, it's an opportunity for you to get a new notch in your belt and help drive important technical and architectural decisions. For everyone, it's a chance to work on a website that will be visited by hundreds of thousands of people.

**Role responsibilities and experience**

Responsibilities:

- Help build components, pages, and features using React and Gatsby, and test them using Jest
- Collaborate with other members of the Digital team e.g. Design and also demo your work to Pride stakeholders from other teams
- Attend occasional meetings and workshops to help drive development decisions and determine next stepsPerson specification:

**You'll ace this if you:**

- are self-motivated and take initiative to accomplish tasks
- are flexible working with technology that's potentially unfamiliar to you
- are accountable and dependable working in a volunteer project
- are interested in creating something awesome while gaining valuable experience.

**Time commitment:**

We'd estimate you'd spend about 4 to 8 hours a week on the project. We get together every other Saturday near Kings Cross, but you're free to work remotely as well.

**To apply for this role**

Please send your CV and a covering letter explaining why you think you're the right fit for the role to kristofhamilton@prideinlondon.org.
