

COMPARTMENT LIGHTING

COMPARTMENT LIGHT

Powered By LED Vital Vio™ Technology

Code 3's Patient Compartment Light multi-tasks by providing continuous disinfection of bacteria on objects and surfaces, while providing safe illumination with its precisely engineered wavelengths of visible light. Vital Vio's lighting technology is proven effective in killing bacteria and other harmful organisms including: MRSA, Salmonella, E. coli, and C. diff. Features include clear polycarbonate lens, bright and dim mode, and a 5 year warranty.

Models

PART NO.	CONNECTOR	LED COLOR
PCL-LED-VV	Bare Leads	<input type="checkbox"/>
PCL-LED-VV-P	Deutsch	<input type="checkbox"/>

Features and Benefits

- 12-24 VDC, 1.5 Amps
- 48 LEDs
- VioSafe™ white light disinfection technology proven to provide continuous disinfection of bacteria on high-touch surfaces in interior environments
- Dramatically reduces contamination while providing white light illumination safe for humans and animals
- Successfully reduces the presence of harmful bacteria and decreases costs associated with illnesses, contamination of goods, and regulatory fines
- Fits in a 7.0" cutout
- Bright and dim mode available
