# HA-5 CONNECTED SAFETY SOLUTION
Featuring HAAS Alert Technology

Code 3 teams up with HAAS Alert to reduce vehicle collisions and increase first responders' visibility with the HA-5 Connected Safety Solution. HAAS Alert technology, paired with Code 3's lineup of reliable lighting and safety solutions, sends digital alerts that warn drivers of approaching or nearby emergency vehicles. When emergency lights are engaged, the HA-5 activates and broadcasts a signal to the Safety Cloud. Connected devices or systems receive the digital signal from the Safety Cloud and an alert is transmitted through an app on drivers' mobile devices or in-vehicle displays.

Models

PART NO.	TYPE	MOUNT	CELLULAR SIGNAL	VOLTAGE
HA-5	Alert System	Dash	3G or 4G LTE	12V

Features and Benefits

- Connects any flashing or emergency flashing lights
- Cellular, GPS, real-time Safety Cloud connectivity
- 100% passive to crews and personnel
- Automatic Waze integration
- Securely mounts on vehicle's dash
- Monthly performance metrics summary reports
- Low voltage shut-off eliminates parasitic draw
- Data included, no additional plan required

Situational awareness web dashboard

- App can be downloaded from any app store
- Search Waze or look for this icon
