

TREMOR™ LOW FREQUENCY SPEAKER

Code 3's Tremor™ low-frequency speaker amplifies siren tones as deep low-end sound waves. These low-frequency tones make emergency vehicles more prominently heard at near and far distances, significantly enhancing first responder safety in urban areas and intersections. The Tremor runs in line with the existing siren amp and can be activated via sources such as the vehicle's horn or the siren's push button controller for easy activation. Activation intervals range between 7.5 and 60 seconds with automatic shut off. Tremor kits come with an amplifier, one or two speakers and mounting brackets.

VOLTS	12V
WATTS	100W / 200W
DIMS	8.8" H x 8.3" Diameter 224mm H x 210mm Diameter (speaker) 2.3" H x 4.9" W x 5.7" D 58mm H x 125mm W x 148mm D (amplifier)
DETAILS	<ul style="list-style-type: none"> • Pairs with existing siren to amplify the siren's tones (no built-in tones) • Speaker activates via the vehicle's horn, siren's controller or other power source • Makes emergency vehicles more prominently heard at near and far distances • Custom activation intervals between 7.5 and 60 seconds with automatic shut off • Durable construction holds up in extreme environments • Stainless steel mounting brackets • 125Hz-1,000Hz
