Ground Light GNDLT-W

The Ground light is a grommet mount white light designed to provide illumination of ground areas at the edge of the apparatus where personnel enter and exit.

Seven powerful LED's put out a rectangular beam spread, so it should be mounted such that the lines on the lens (fresnelling) are vertical to spread the light left and right.

A 4.5" hole (which is an industry standard) is required to mount the light.

The red wire should be connected to +12VDC and the black wire to chassis ground.

Amp draw is .5A @ 12VDC.
