

Two full levels of lighting & only 3" high

PT47

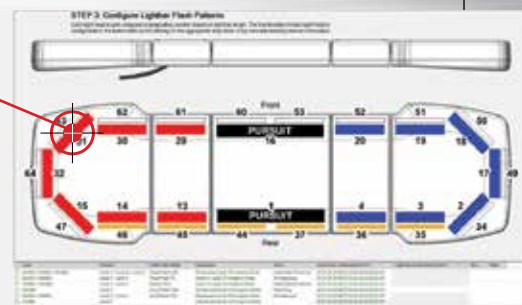

SPECIFICATIONS

- 24" (604 mm), 30" (754 mm), 36" (914 mm), 41" (1054 mm), 47" (1194 mm), 53" (1346 mm), 59" (1499 mm), 65" (1651 mm), 71" (1803 mm), 77" (1956 mm) length
- 13.45" (W) x 3" (H) (343 x 76 mm)
- Multi-voltage (10–30V) operation with class-leading Electro Magnetic Compatibility (EMC) performance
- Designed to meet Society of Automotive Engineers (SAE) Class 1, California Title 13 when properly configured
- 5-year warranty on LED modules and central controller

Easy to Customize/Program

- C3 Pro allows user to configure and view desired flash patterns and level selections before loading software into Pursuit™ bar.
- Provides user with the option to create unlimited flash patterns by assigning each individual lighthouse or group its own flash pattern.
- Allows user to control upper level primary and lower level secondary lights, ArrowStik®, and full takedown at the same time.
- Increases intersection safety with the exceptional Code 3 sweeping intersection light pattern.
- Gives user the option to choose from a high or low cruise intensity and a high or low dim feature.

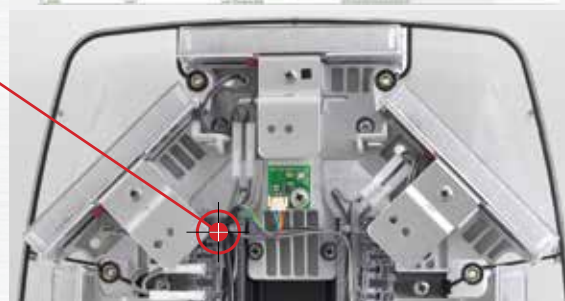

C3 Pro Interface Configurator (Flash Patterns)

Easy to Install/Troubleshoot

- Single data cable simplifies the routing and installation.
- Quickly identify lighthouses in need of service with individual indicator lights on the circuit board.
- Easily differentiate LED by lighthouse's color coded grommet.

Easy to Install and Troubleshoot

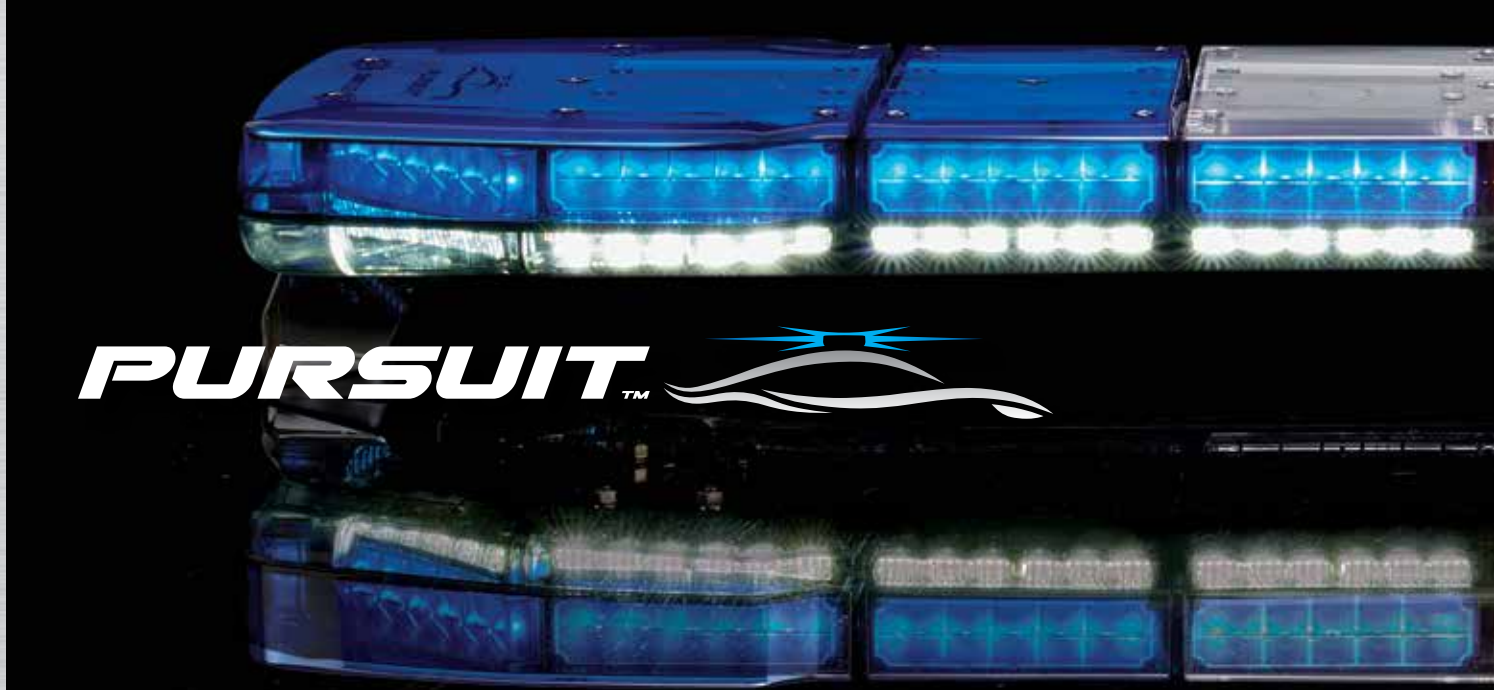

Easy to Maintain

- Designed to increase the longevity of the lightbar by preventing water ingress and cable wear with a molded grommet system.
- Neatly contains wires and eliminates pinched wires with an organized internal locating system.
- Prevents screw stripping or cracking by utilizing brass inserts molded into the polycarbonate base.
- Neutralizes ultraviolet (UV) degradation with aluminum plates.

Easy to Maintain

The Next Generation Lightbar

The spectacular design of the Pursuit lightbar from Code 3 reimagines what an emergency lightbar should be. The lightbar features two complete levels of lighting in the height of a single-level lightbar. Pursuit has unlimited flash patterns and a convenient interface for easy, customizable programming.

DESIGN FEATURES

- 2 unique levels of lighting in a 3" high lightbar
 - Single color upper LEDs in red, blue, amber or green*
 - Powerful lower level LEDs for use as takedowns, alley, rear arrowstik, flashing and intersection lights available in white, amber, red or blue
- C3 Pro™ interface programming for an unlimited number of flash pattern options
- Corner intersection sweeping flash pattern for lower level lights
- Integrated lens sealing system
- Encapsulated control electronics
- Serial network control: thin, flexible wiring harness
- PC programming software
- Internal wiring channels
- Auto dimming with photocell
- Selectable dimming levels for each light

OPTIONS

- Lower level traffic director
- Upper lenses available in red, blue, amber or clear
- Internal illuminated sign module is protected from weathering, available with the in 36", 47", 59" lengths*
