

# Get from request to signature faster with Docusign Agreement Desk

Transitioning an agreement from initial request to final execution remains a significant operational challenge. Without a centralised system, the process often becomes fragmented, with critical information buried in email chains and version control becoming increasingly difficult. This lack of transparency leaves key stakeholders without a clear view of the agreement status, ultimately slowing down business momentum.

Docusign Agreement Desk empowers teams with end-to-end agreement management within **Docusign IAM**. It is a collaborative hub that streamlines intake, accelerates reviews and centralises approvals for faster finalisation. And, using the power of AI-Assisted Review, you can turn contracts around faster with AI-powered review directly in Microsoft Word.

## Accelerate the intake, review and finalisation of agreements

Agreement Desk streamlines the journey from request to signature. It starts with intake: submitting a new agreement request is as easy as sending an email. Because the process is familiar, your business users can bypass the learning curve and start immediately.

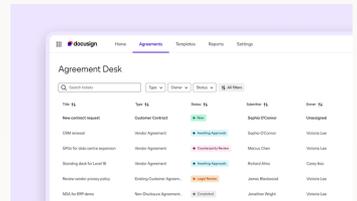

Then the request instantly converts into a trackable task on your Agreement Desk dashboard.

From there, momentum builds. Agreement Desk centralises approvals, simplifies collaboration and fast-tracks sending for signature. You can even use **Docusign Maestro** to automate key workflow stages, ensuring every agreement progresses smoothly from creation to execution without manual bottlenecks.

# 77%

of leaders in high-performing organisations credited agreement management with positioning them to outperform in core business areas, including strategic, financial and productivity goals.

Value is unlocked by removing friction within the organisation, optimising workflows, standardising contracts and providing proactive insights.

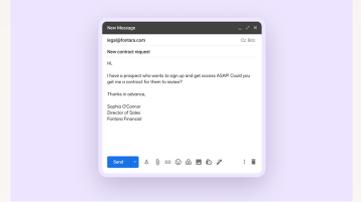

## Elevate visibility across your organisation

Siloed emails and disjointed systems kill collaboration. Agreement Desk brings total transparency to your process, giving every stakeholder a clear view of how in-flight agreements are progressing.

In just a few clicks, you can see all the necessary information, like status updates, due dates and new drafts. Agreement Desk's dashboards and reporting capabilities give you both a bird's eye view of all of your agreements and the ability to home in on individual details and statuses.

Leverage comprehensive reporting to track performance across key metrics or home in on specific details on a per-contract basis. With Agreement Desk, visibility and optimisation are effortless.

## Manage risk and compliance across teams with DocuSign AI-Assisted Review

More stakeholders often means more errors, but DocuSign changes that equation. DocuSign AI-Assisted Review speeds up agreement review and negotiation in line with your company's legal and other requirements. Review agreements against your pre-approved playbooks and get redline suggestions to align language with your standards. You can also iterate with conversational AI to answer questions, analyse terms, suggest edits or draft new language from scratch.

Users can easily accelerate agreement review and negotiation and empower more of the organisation to get involved, while ensuring agreements are reviewed according to the same standards and requirements. This saves legal teams time and allows them to focus on higher-value, more strategic work.

## About DocuSign

DocuSign brings agreements to life. Over 1.6 million customers and more than a billion people in over 180 countries use DocuSign solutions to accelerate the process of doing business and simplify people's lives. With intelligent agreement management, DocuSign unleashes business-critical data that is trapped inside of documents. Until now, these were disconnected from business systems of record, costing businesses time, money, and opportunity. Using DocuSign's Intelligent Agreement Management platform, companies can create, commit, and manage agreements with solutions created by the #1 company in e-signature and contract lifecycle management (CLM).
