

## Expert Medical Opinion – Video Descriptive Transcript

Audio	Visual
Welcome to Teladoc Health's Expert Medical Opinion.	The Teladoc Health logo appears and transitions to a woman sitting on a couch asking questions.
Do you need medical questions answered by a leading expert, or a diagnosis double-checked? Whether you need help deciding on a treatment plan, guidance about the need for surgery, or anything in between - we can help.	Two doctors sit at a desk reviewing patient info. Next a nurse reviews a treatment plan. This transitions to someone being treated in a hospital bed and finally a mother and daughter having a conversation together.
Expert Medical Opinion is more than just a second opinion; it is a confidential process that complements the care you receive from your own physician by providing a second expert review, bringing greater certainty to your diagnosis and treatment plan.	A female doctor in a lab coat is proudly standing in a lab.
Teladoc Health's medical specialists perform an in-depth analysis of your medical data, including diagnostic imaging, test results and pathology samples.	A female doctor sits and works at a computer to review and analyze patient medical data.
We provide an expert's detailed summary of the findings, which we encourage you to share with your physician.	A man sits on a set of stairs in front of a building and smiles as he reviews the summary of the findings that he received back from his expert's review of his case.
Next your medical records will be collected, including imaging and pathology samples, where it will be reread and may be retested. Then a specialist will conduct an in-depth review.	A specialist sits in an office working on his computer and reviewing patient data.
Once the review is complete, a doctor will compile the expert report and will review the report with you, at your requested time and answer any outstanding questions.	A doctor writes out a report and then it transitions to a man sitting on a sofa reviewing his report.
