

Holed up and feeling down?

PrivX: access IT better

Deploy privileged access management (PAM) in days.

- ✓ Mitigate privilege abuse risk with passwordless IT access.
- ✓ Install and manage remotely. Scale as your needs change.
- ✓ Instant onboarding, automatic access revocation on departure.

Only needs a web browser

No need to install and configure a separate client/host like with jump hosts. Centralized SSO access and its management in a web browser. Virtually no training.

Configure once. No agents needed.

Once you have PrivX setup, you're already done! Everything now works right away for your whole team. No agents needed. Remote installation IS an option.

Automate access management

After a one-time configuration, PrivX keeps identities & authorizations in IAM/AD/LDAP in sync with entitlements that are located in PrivX as roles. Your admin manages just a dozen of static roles instead of constantly changing identities.

Manage from home

No need to risk 'going outside'. You can manage all secure access via PrivX, for your entire DevOps team, entirely from the comfort of your own home. PrivX also auto-discovers all your cloud hosts (AWS, Azure, GCP) to reduce manual work.

Session recording & playback included

Access to all systems, especially critical IT systems, is always audited and logged by design. You can also enable session recording as you see fit, and play them back at your leisure.

Mitigate the risk of privilege abuse

With PrivX, no one ever handles or sees any privileged credentials. Access authorization is revoked automatically every time. No leave-behind privileged credentials to steal, abuse or lose.

Try it for free & see how you like it. No obligation necessary.

PAM reimaged

- ✓ Can be deployed in days
- ✓ Just-in-time ephemeral access
- ✓ No permanent credentials
- ✓ SSH/RDP/HTTPS connections

Minimized configurations

- ✓ One-time IAM/AD/LDAP integration
- ✓ One-time host configuration
- ✓ Virtually no maintenance

Built for the multi-cloud

- ✓ Micro-services architecture
- ✓ Scales on demand
- ✓ On-prem supported
- ✓ Extra point

Respects your infrastructure

- ✓ No software agents
- ✓ No changes to your host setup
- ✓ Light footprint

A Full Range of Global Support Services

'PrivX Free' Support

- Online support during business hours.
- <2 business day solution goal for critical issues.
- <5 business day solution goal for non-critical issues.
- Dedicated Slack channel.

Premium 8x5 Support

- Phone & Online support during business hours.
- <4 business hour solution goal for critical issues.
- <2 business day solution goal for non-critical issues.
- Up to 6x support contacts.

Premium 24x7 Support

- 24x7 Phone and Online support.
- <2 business hour solution goal for critical issues.
- <24-hour solution goal for non-critical issues.
- Other support options.

Get Started on Your PrivX Journey (and make IT better)

PrivX Test Drive

- ✓ Nothing to install
- ✓ Nothing to configure

PrivX Free

- ✓ Up to 20x hosts
- ✓ No purchase or obligation

PrivX Business Edition

- ✓ Up to 500 hosts
- ✓ Available on subscription basis

PrivX Enterprise Edition

- ✓ For over 500 hosts
- ✓ Give us a call & we'll chat
