

Medical

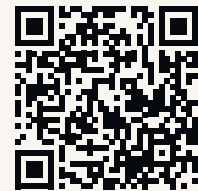

Your provider of medical polymer solutions

Entec Polymers offers an expansive selection of medical-grade resins from our top-tier supplier network. With in-depth knowledge of medical polymers, healthcare device manufacturing and the ever-changing regulatory market, our experts provide the comprehensive level of support that customers require when producing critical and safe healthcare applications. From concept to material selection to production, our team will help you accomplish your goals and achieve a competitive edge in medical.

Application Assistance

- Material Selection
- Metal to Plastic Conversion
- Light Weighting
- Part Consolidation
- Regulatory
- Technical Documentation
- Product Development
- Processing Assistance & Troubleshooting
