

Electrical and Electronics

Advanced thermoplastics for smarter, safer electronics.

At Entec Polymers, we help electrical and electronics manufacturers move faster from concept to production with advanced thermoplastics and hands-on technical support. Along with a deep portfolio of high-performance materials and custom compounding options, our Application Development and Technical Service teams work with you at the design stage to identify the right resin, review part and mold designs, and solve potential challenges before they reach the production floor. This early collaboration shortens development cycles and strengthens product performance, giving you the flexibility, consistency and insight you need to stay ahead in a rapidly evolving market.

Material solutions ready for every electrical and electronics application.

- Batteries
- Boxes
- Cabinets
- Cables & Cable Management
- Conduit
- Connectors
- E-Motors
- Electronics
- Housings
- Lighting
- Panels
- Plates
- Racks
- Semiconductors
- Sensors
- Wire Management
