

Rotational Molding

# Rotational Molding Resin Solutions Built for Durability

Entec Polymers delivers high-performance resin solutions for the rotational molding industry, helping manufacturers meet the demands of large, complex, and durable applications. With a full portfolio of polyethylene and specialty polymers, backed by technical expertise and responsive service, we provide the tools and support rotomolders need to innovate, grow, and lead in a competitive market.

Whether you're producing tanks, containers, or specialty molded parts, our materials are engineered to meet your performance, durability, and processing needs.

- Polyethylene grades: HDPE, MDPE, LLDPE, LDPE, and cross-linked PE
- Specialty polymers: Nylon (PA), tie-layers, impact modifiers, and barrier resins
- Custom compounds: Colored products and specialty blends made to order
- Flexible formats: Available in pellet or powder form, with delivery options including railcar, bulk truck, and box shipments
