

TX-E101 Four Button Chrome Wireless Keyfob

Installation Sheet

Enrolling

Each keyfob is learned in to a control panel as an unsupervised sensor and uses one available zone slot. For all Concord, Simon3 and Simon XT panels, use sensor group number 01, 03, 06 or 07. Please refer to your specific control panel installation manual for full instructions.

Operation

Lock

Depending on your control panel:
 Press once to arm in Stay mode.
 Press twice to arm in Away mode.
 Press three times to activate the latchkey feature.

Unlock

Press this button to disarm your system. You do not have to enter your access code when you use this key to disarm the system.

Light

For NetworX panels, press this button to arm the system in Stay mode. For Concord, Simon 3 or XT it will turn system controlled lights on or off.

Star

The star button function depends on the individual panel programming. Refer to the installation instructions for your panel.

Panic or Aux

If the keyfob is programmed using a panic or portable auxiliary group number, pressing the Lock and Unlock buttons simultaneously will activate an audible or silent alarm (depending on group number) and initiate reports to the central station.

Replacing the Battery

Because keyfobs are non-supervised devices, a low battery signal will only be received by the control panel when the device is within range of the receiver and a button is pressed (if the device is not in use, no low battery signal will be sent until a button is pressed). When the device is carried beyond the range of the receiver and/or is seldom used/tested, the battery could wholly deplete without a warning of the battery condition being sent to the panel. If the LED on the device appears dim or does not turn on when a button is pressed, it is a warning that the battery may be low or depleted and should be replaced. To ensure proper functionality, test the device weekly and follow these simple steps to replace the battery when necessary:

1. With a key or small screwdriver, press the black tab located at the bottom of the remote (fig.1) and slide the chrome trim off.
2. Carefully separate the front and back piece of plastic to reveal the battery.
3. Replace with a CR2032 battery ensuring the + side of the battery faces up (fig.2).
4. Re-assemble the plastics and ensure they click together
5. Ensure the notch in the chrome trim is aligned with the back of the plastic. It will only go on one way (fig. 3).

FCC Compliance Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by UTC Fire and Security could void the user's authority to operate the equipment.

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

Cet appareil est conforme avec Industrie Canada exempts de licence standard RSS (s). Son fonctionnement est soumis aux deux conditions suivantes: (1) cet appareil ne doit pas provoquer d'interférences et (2) cet appareil doit accepter toute interférence, y compris celles pouvant causer un mauvais fonctionnement de l'appareil.

In accordance with FCC requirements of human exposure to radiofrequency fields, the radiating element shall be installed such that a minimum separation distance of 20 cm is maintained from the general population.

FCC: XQC-WST101
IC: 9863B-WST101

This Class B digital apparatus complies with Canadian ICES-3B.
Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.
