

UK's cheapest energy

Energy only customers on our Value variable tariff can get the cheapest energy in the market compared against standard variable tariffs which are 'available for sale' - publicly available and excl. competitor tariffs for existing customers only.

Comparisons based on the typical domestic consumption values (as set by Ofgem), for customers who pay by direct debit and are on a credit meter. Correct at 12/09/2022. Plus UW is currently offering cheaper variable energy tariffs, available to multiservice UW customers - those who take energy and broadband, mobile and/or insurance (excl. Bill Protector).
