2,000 calories a day is used for general nutrition advice, but calorie needs vary.

Like most restaurants, our restaurants prepare and serve products that contain Soy, Egg, Fish, Milk, Peanuts, Crustacean/Shellfish, Tree Nuts, Wheat, and Gluten. While a particular ingredient statement may not list one of these allergens, our products may be prepared with equipment that is shared with products containing one or more of these allergens. If you have a food allergy, please consult with your physician before deciding which Qdoba products are right for you. We also recommend reviewing our ingredient and allergen information frequently at www.qdoba.com as our menu items and ingredients may change.

Letters in Red: May contain the allergen. There are products containing wheat, soy, milk, egg and gluten in our restaurants where cross contact may occur during food preparation and storage. If you have a food allergy to any of the ingredients prepared or served in our restaurants, please keep this in mind when deciding which Qdoba products are right for you.

* Nutrition information is based on representative values provided by suppliers and is verified conducted by accredited laboratories. The nutritional content of Qdoba products may vary because our products are made to order by hand and individual serving sizes can vary based on the server and customer requests when ordering. This, along with changes in growing seasons and multiple suppliers, may contribute to variations in the nutrition values for each product. Serving size based on standard entree portion size.

****** Calorie ranges for Entrées are based on base ingredients. Actual calories may vary depending on your ingredient preferences and portion size.
