

## DWIGHT CAPITAL

### Senior Software Engineer

*New York, NY*

Dwight Capital is a leader in commercial real estate finance and is one of the largest FHA/HUD lenders in on multifamily and healthcare properties in the United States. Our range of services include commercial lending across a variety of platforms such as CLO, USDA, Bridge, Mezzanine, and Preferred-Equity for both stabilized and new-construction properties.

Dwight is seeking a team player who has a “no job too big or too small” attitude. A proactive thinker with a can-do mentality who is ambitious and intuitive will prove successful. Dwight is looking for an individual who takes pride in their work and flourishes in a fast-paced environment. Must have the ability to manage time wisely, follow up, and communicate status of projects. Our ideal candidate will take direction from the Executive Management team well, offer creative and prompt solutions to issues, and provide meticulous attention to detail.

### Role & Responsibilities

- Maintain a proprietary data management pipeline, web-based portal and build out new features and integrations for the web portal
- Work with business leadership to identify opportunities to provide operational improvements and competitive advantages through custom technology solutions
- Serve as the Principal Engineer in all software development projects across the organization
- Build a set of internal and external resources to accelerate software development projects to meet the business’s needs
- Design, build, scale and evolve data pipelines
- Own the QA, alerting, monitoring, and maintenance of pipelines
- Implement the standardization, transformations, and normalizations of datasets
- Collaborate with Business and Information Technology teams to identify opportunities to continue to improve scalability, monitoring, accuracy and delivery of data

### Required Experience & Skill Sets

- Experience building and shipping custom software solutions within organizations
- Experience building and managing a team of engineering resources
- Proficient in working with AWS or other Cloud based Web Servers
- Have a B.S. in Computer Science or equivalent with 5+ years of experience
- Are self-motivated and dislike micro-management
- Are always striving to find and use the right tool for the job at hand

- Feel passionate about the latest technologies
- Deeply care about clean code and correctness
- You're a team player with a "winning-team" attitude
- Have excellent communication skills

## Overview of Benefits

- 401(k) & profit-sharing programs
- Healthcare Plan including dental & vision, as well as HSA account options
- Floating holiday schedule (9 Days)
- Paid Time Off (PTO) commiserate with experience & tenure
